INTRODUCTION

The Olympic Games is one of the oldest athletic competitions in the world. It originated in ancient Greece and was revived in the late 19th century. Every two years, with alternating summer and winter games, representatives of hundreds of countries compete in the Olympics, with hopes of bringing home a gold medal.

When the Games are played, controversies inevitably arise pertaining to athletes and events, which involve a myriad of issues, rules, and regulations. One such controversy was kindled during the Summer Olympics in London in perfect timing with the lighting of the torch – the tax treatment of American Olympians under the United States Internal Revenue Code (the “Code”). On August 1, 2012, Congressman Aaron Schock (R-IL) and Senator Marco Rubio (R-FL) proposed The Olympic Tax Elimination Act (H.R. 6267 and S. 3471, respectively), a bill that would eliminate taxes on prizes and awards won by U.S. Olympians. As support for their proposal, the members of Congress reasoned that our Olympians are nobly representing America when they compete in the Games, and thus should be recognized with a tax-free prize. This proposal has been received throughout the political realm with reactions ranging from brutal criticism to passionate support. At the heart of the issue is

2. Id.

3. Id.

Section 74 of the United States Internal Revenue Code, which the bill would modify. The income tax laws in the United States have evolved since their enactment in 1913. The most recent major tax reform took place in 1986, when many provisions were added or modified. One of the provisions that was altered was Section 74, which addresses the tax treatment of prizes and awards. Section 74(a) mandates, generally, that gross income includes all amounts received as prizes and awards. That means that, currently, United States Olympians, like all American citizens, are required to pay taxes on their prizes and awards. Specifically, they must add the value of the cash prize and the fair market value of the medal to their gross income in order to determine their tax liability.

According to the Americans for Tax Reform website, the medals are valued at approximately $675 for gold, $385 for silver, and $5 for bronze; and the cash prizes are $25,000 for gold, $15,000 for silver, and $10,000 for bronze. Using the 2012 top income tax rate of 35%, which admittedly is not applicable to most Olympic athletes, an Olympic winner would be required to pay taxes totaling approximately $9,000 for a gold, $5,500 for a silver, and $3,500 for a bronze.

The Olympic Tax Elimination Act, as its name suggests, would remove the tax liability that Olympians owe on prizes

12. Id.
13. Id.
16. I.R.C. § 1(c) (2012). Tax rates increased in 2013. The current top rate is 39.6%. For purposes of this note, we will use the 2012 tax rates, because The Olympic Tax Elimination Act was proposed in 2012, and the Olympic medalists to whom this Act would apply retroactively received their awards in 2012.
17. See infra note 143 for a more realistic and precise calculation of an Olympic athlete’s tax burden.
and awards. Our current tax law contains many loopholes that are often hard to understand and apply. As Section 74 has evolved, Congress has tried to create an even playing field for all winners of prizes and awards, thereby closing any potential loopholes. The Olympic Tax Elimination Act, if enacted, would create the exact type of exemption that Congress has tried to prevent throughout the evolution of Section 74. The very members of Congress who support this bill concede that it would create an exception specifically designed only for U.S. Olympians. Thus, we are faced with the question, why should Olympians receive a tax benefit when all other U.S. citizens are required to pay taxes on “income from whatever source derived?” More specifically, what makes Olympians more worthy of a tax benefit than Nobel Prize winners, Pulitzer Prize winners, World Cup champions, and the like?

This Comment first examines the history and evolution of Section 74, pertaining to the taxation of prizes and awards. It then focuses on the specific area of athletic prizes and awards, and whether such prizes have historically been excludable from gross income under Section 74(b). In Part II, this Comment reviews The Olympic Tax Elimination Act, and the reasons for its proposal. Following an overview of the proposed bill, in Part III, this Comment reviews an array of political opinions ranging from emphatic support to outright disapproval of the bill and its implications. In Part IV, it argues that the bill should not be passed, and examines the potential implications of any passage.

I. HISTORY OF SECTION 74 OF THE INTERNAL REVENUE CODE

A. The Original Section 74

Before the Tax Reform Act of 1986, Section 74 of the Internal Revenue Code provided an incentive to taxpayers who directly benefitted society through their

accomplishments\textsuperscript{25} by excluding awards and prizes from gross income if they were awarded for certain prescribed achievements.\textsuperscript{26} The original Section 74 specifically mandated a three-prong test to determine if prizes and awards were excludable: (1) the award must be “made primarily in recognition of religious, charitable, scientific, educational, artistic, literary, or civic achievement”; (2) the recipient of the prize or award must be selected without any action on his part to enter a contest or proceeding; and (3) the recipient must not be required to render substantial future services as a condition to receiving the prize.\textsuperscript{27} One of the justifications for a regulation geared towards providing tax benefits in recognition of a public service was that “requiring winners of scholarly awards to pay taxes on them would conflict with the wise and settled policy of encouraging scholarly work.”\textsuperscript{28}

Congress’s aim was to provide a tax-benefit to people who had used their “talents for the betterment of society,” while at the same time, ensuring that game show prizes, lottery winnings, and other solely compensatory awards would be subjected to a tax.\textsuperscript{29} However, several problems arose with this statute because the seven areas of achievement listed as warranting a tax benefit were not defined.\textsuperscript{30} This created

\begin{flushleft}
\textsuperscript{26} I.R.C. § 74 (1982). Before the modifications enacted by the Tax Reform Act of 1986, section 74 of the Internal Revenue Code provided as follows:
(a) General Rule.—Except as provided in subsection (b) and in section 117 (relating to scholarships and fellowship grants), gross income includes amounts received as prizes and awards.
(b) Exception. — Gross income does not include amounts received as prizes and awards made primarily in recognition of religious, charitable, scientific, educational, artistic, literary, or civic achievement, but only if—
(1) the recipient was selected without any action on his part to enter the contest or proceeding; and
(2) the recipient is not required to render substantial future services as a condition to receiving the prize or award.
\textsuperscript{27} Id.
\textsuperscript{28} McDermott v. Comm’r, 150 F.2d 585, 588 (D.C. Cir. 1945).
\textsuperscript{29} Kogan, supra note 8, at 269; H.R. REP. NO. 83-1337, at 4036 (1954), which states:
Your committee’s bill includes in income subject to tax all prizes and awards except those made in recognition of past achievements of a religious, charitable, scientific, educational, artistic, literary, or civic nature, where the recipient was selected without any action on his part and is not required to render substantial future services. This exception is intended to exempt such awards as the Nobel and Pulitzer prizes.
\textsuperscript{30} Kogan, supra note 8, at 270.
\end{flushleft}
confusion as to what type of activity or achievement fell into
the specific categories.\(^31\)

In *McDermott v. Commissioner*, the Petitioner was
awarded the 1939 Ross Essay Prize of $3,000 by the American
Bar Association.\(^32\) The Ross Prize was given to the winner of
an annual essay competition.\(^33\) Each year, the American Bar
Association would choose a topic “of timely public interest
with a view to bringing about a scholarly consideration
thereof,” with the objective to promote public welfare.\(^34\) In
1939, the year in which Petitioner was selected as the winner
of the Ross Prize, the subject of the essay was, “To What
Extent Should Decisions of Administrative Tribunals be
Reviewable by the Courts?”\(^35\)

The Commissioner of Internal Revenue ruled that the
prize was taxable as income, and the Tax Court agreed.\(^36\) In
reversing the Tax Court’s decision, the United States Court of
Appeals for the District of Columbia ruled that the prize was
awarded in recognition of a scholarly achievement, and thus,
was not taxable as income.\(^37\)

In 1962, in *Simmons v. United States*,\(^38\) the United States
Court of Appeals for the Fourth Circuit was faced with the
task of determining whether a prize awarded to a person for a
fishing competition fell within the meaning of Section 74(b)
and was thus excludable from gross income. The Third
Annual American Beer Fishing Derby awarded Plaintiff a
prize of $25,000 for catching a fish wearing an identification
tag for purposes of the competition.\(^39\) The IRS asserted that
the cash prize was includable in Plaintiff’s gross income, and
the District Court upheld the IRS’s assertion.\(^40\) Plaintiff then
appealed, arguing that his achievement fell under one of the
seven prescribed areas under Section 74(b) for prizes and
awards.\(^41\) Specifically, Plaintiff argued that the prize was
made in recognition of a civic achievement, because the

The Tax Treatment of Olympians

purpose of the American Brewery, Inc. in offering such a prize was “to popularize the recreation and resort facilities of the state of Maryland.”

Unlike the result in McDermott, the court ultimately concluded that the prize did not fall within Section 74(b), and thus was includable in income. The court rejected Plaintiff’s argument on the grounds that to classify such an achievement as one of civic recognition would be stretching the original intent of the legislature in enacting Section 74(b); it “requires a considerable flight of fancy to romanticize the Fishing Derby into a civic endeavor.” The court reasoned, “the statute’s legislative history indicates that only awards for genuinely meritorious achievements were to be freed from taxation.” The court further reasoned that, “[f]ar from resembling a Nobel or Pulitzer prize-winner, [plaintiff] Mr. Simmons fits naturally in the less-favored classification the legislators reserved for beneficiaries of ‘giveaway’ programs.”

The court aligned its decision with Congress’s intent to provide tax incentives to those who better society through their achievements, while ensuring that game show winners and the like are not given a tax benefit merely for their participation in an inherently compensatory contest.

B. Athletic Achievements

As courts continued to interpret and apply Section 74, one question that inevitably arose was whether an athletic achievement fell within one of the seven categories, and thus warranted tax-free status under Section 74.

This issue was addressed in Hornung v. Commissioner, in which the petitioner claimed that his award was nontaxable under Section 74. Petitioner, a professional football player for the Green Bay Packers, was named most valuable player by Sports Magazine, and, as a result of his achievement, was

42. Id. at 162.

49. Hornung, 47 T.C. at 429.
awarded a Chevrolet Corvette. The issue for the court was whether the award had been given in recognition of educational, artistic, scientific, or civic achievement, thereby making it tax-exempt. Petitioner made several attempts to classify his achievement as fitting within one of the seven prescribed areas in the Code. He first argued that the game of football is educational in that it is taught in colleges as part of physical education. Hornung also argued that his award qualified as an artistic achievement because the game of football "calls for a degree of artistry." Additionally, he claimed that the skills of football are based on techniques that encompass scientific principles, and therefore the achievement falls within the scientific exception. Hornung’s final argument was that the award was made in recognition of a civic achievement due to the alleged interest of the President in his application for leave from the Army in order to play in the championship game.

Based on these arguments, the court was faced with the challenge of interpreting the language of Section 74. In holding against Hornung, the court stated that, "the words 'educational,' 'artistic,' 'scientific,' and 'civic' as used in section 74(b) should be given their ordinary, everyday meaning in the context of defining certain types of personal achievement." Ultimately, the court decided that the award was includable in income, because such an athletic achievement does not fall within any of the seven prescribed areas of achievement outlined in Section 74. "We feel confident that Congress had no intention of allowing professional football to constitute a type of activity for which proficiency could be recognized with an exempt award under section 74(b)." The court reasoned, "[h]ad Congress intended to except prizes or awards for recognition of athletic prowess or achievement it could readily and easily have done so; as provided now however, no such

60. Id. at 437.
exception can be read into the statutory language used.”

This issue of athletic achievement in the context of Section 74 was also addressed in Wills v. Commissioner. Plaintiff, a professional baseball player for the Los Angeles Dodgers, was awarded a gold and jewel-encrusted belt for his outstanding athletic achievements during the 1962 baseball season. Plaintiff claimed that the fair market value of the belt should not be includable in his taxable income because the award was made “primarily in recognition of religious, charitable, scientific, educational, artistic, literary, or civic achievement.” The court cited Hornung v. Commissioner, for the rule that words should be given their ordinary meaning. Additionally, Wills argued that the belt should be tax-exempt because it “is a ‘trophy,’ that Section 74 is silent on the question of a trophy, and that the belt has no fair market value because recipients intend to treat it as a ‘trophy.’” The court ultimately rejected these arguments and concluded that Wills’s achievement did not fall within one of the exceptions under Section 74(b), and thus was not excludable from gross income.

C. The Current Section 74

Congress did not intend to make athletic achievements an exception under Section 74(b), as evidenced in the cases above. However, if there was any doubt about a taxpayer’s right to exclude such prizes and awards from his or her gross income, the current tax provisions eliminate any remaining

uncertainty. In 1986, Congress amended the previous Section 74, transforming it from a three-prong test into a more stringent four-prong test. Now, in addition to the three requirements under the previous section, the recipient of the prize or award must assign the award to a governmental unit or qualified charitable organization, in order for a tax-benefit to be rendered. This narrows the previous intent of Congress to provide tax exemptions to those who better society through the seven defined areas and do not personally profit from those contributions. Congress seemed to reason that those who give their prizes or awards to a governmental unit or qualified charitable organization are the true benefactors of society, and the only award-winners who may actually receive a tax exemption under Section 74. This additional requirement under the current Section 74 has greatly changed the application of the Code to winners of prizes and awards. Nobel prizes and Pulitzer prizes, for example, are no longer excludable from gross income unless given away to the government or to a charitable organization.

This modification does not change the fact that athletic achievements will generally not be considered to fall within one of the seven exception areas under 74(b); an athlete’s argument for a tax exemption under Section 74(b) will continue to fail at the first step of the analysis. However, it is now clear that prize-winners will not be able to exclude their

71. See id.; I.R.C. § 74(b) (West 2013), states, in relevant part:
§74. Prizes and Awards
(b) Exception for Certain Prizes and Awards Transferred to Charities.—Gross income does not include amounts received as prizes and awards made primarily in recognition of religious, charitable, scientific, educational, artistic, literary, or civic achievement, but only if—
(1) the recipient was selected without any action on his part to enter the contest or proceeding;
(2) the recipient is not required to render substantial future services as a condition to receiving the prize or award; and
(3) the prize or award is transferred by the payor to a governmental unit or organization described in paragraph (1) or (2) of section 170(c) pursuant to a designation made by the recipient.

76. See I.R.C. § 74(b)(3) (2013)
77. Kogan, supra note 8, at 287.
prizes from their gross income unless, in addition to fulfilling the original three requirements, they altruistically give it to a governmental unit or charity.\textsuperscript{78} It must be emphasized that in this situation, the prize-winner would not actually be keeping his or her award. To illustrate, even if, contrary to judicial precedent, an Olympian athlete fulfilled prong 1 of Section 74’s test, succeeding on the potential argument that his or her prize qualifies under one of the seven achievement areas, he or she would still not be able to claim a tax exemption unless he or she subsequently gave the prize to the government or to a charitable organization.\textsuperscript{79}

II. THE PROPOSED BILL

In August of 2012, Florida Senator Marco Rubio and Illinois Representative Aaron Schock introduced the Olympic Tax Elimination Act, a bill that would exempt U.S. Olympic medal winners from paying taxes on their cash awards or their medals.\textsuperscript{80} The bill proposes to amend Section 74 of the Internal Revenue Code, by adding an exception for Olympic medals and prizes: “Gross income shall not include the value of any prize or award won by the taxpayer in athletic competition in the Olympic Games.”\textsuperscript{81} The bill provides a retroactive application to apply to winners in the 2012 Summer Olympics.\textsuperscript{82}

As reasoning behind the proposal of this new bill, Rubio urged that U.S. Olympic athletes represent our nation in the Olympics and “shouldn’t worry about an extra tax bill waiting for them back home.”\textsuperscript{83} Rubio sympathizes with most

\textsuperscript{78} Id.; I.R.C. § 74(b)(3) (2013).
\textsuperscript{79} Id.; I.R.C. § 74(b)(3) (2013).
\textsuperscript{80} Rubio, supra note 5; H.R. 6267, 112th Cong. (2012).
\textsuperscript{81} H.R. 6267, 112th Cong. (2012): Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, Section 1. Elimination of Tax on Olympic Medals.
(a) In General. – Section 74 of the Internal Revenue Code of 1986 is amended by adding at the end the following subsection:
“(d) Exception for Olympic Medals and Prizes. – Gross income shall not include the value of any prize or award won by the taxpayer in athletic competition in the Olympic Games.”
(b) Effective Date. – The amendment made by this section shall apply to prizes and awards received after December 31, 2011.
\textsuperscript{82} Id.
\textsuperscript{83} Rubio, supra note 5.
Olympians who go unnoticed, do not earn salaries to support their lifestyles, and “often struggle to balance their demanding training schedules with work.”\textsuperscript{84} Rubio strongly emphasized that “these Olympians are a source of national unity and that their athletic excellence should not be punished.”\textsuperscript{85}

III. THE POLITICAL DEBATE

The bill has sparked both negative and positive treatment from a range of political figures. Thirty-nine House and Senate members signed on as co-sponsors of Senator Rubio’s Olympic Tax Elimination Act.\textsuperscript{86} Among the supporters is Senator Lamar Alexander, Republican of Tennessee, who announced that he was cosponsoring the Act because of his belief that “Our Olympians deserve our praise and accolades, not more tax bills, when they win at the Olympics.”\textsuperscript{87} In addition, then-Congresswoman Rochelle Berkley (D-Nev.) has proclaimed her support for the bill.\textsuperscript{88} Berkley has said, “Our U.S. athletes shouldn’t have to worry about being hit with a big tax bill for being successful in the Olympic Games and making America proud of their accomplishments.”\textsuperscript{89} Berkley agreed with Senator Alexander in proclaiming that “We shouldn’t be honoring the accomplishments of our Olympic athletes and then turning around and hitting them with heavy taxes on those achievements.”\textsuperscript{90} Congressman Walter Jones (R-NC) also voiced his irritation at the policy that Olympians are taxed on their awards.\textsuperscript{91} He has called the practice “ridiculous” and asked, “Why are we punishing them for medals and money that they have worked hard for and

\begin{itemize}
\item \textsuperscript{84} Id.
\item \textsuperscript{85} Id.
\item \textsuperscript{86} Boselovic, supra note 6.
\item \textsuperscript{89} Id.
\item \textsuperscript{90} Id.
\end{itemize}
received while proudly representing the United States on a world stage? It makes no sense.”

Former-Congresswoman Mary Bono Mack (R-Calif.) and Congressman G.K. Butterfield (D-NC) even went so far as to say, “Taxing the Olympic medals of U.S. athletes is like Scrooge putting a tax on Christmas presents...It’s just wrong.” Bono Mack and Butterfield went on to say, “Only the U.S. tax code can turn the ‘thrill of victory’ into the agony of victory. We strongly urge our colleagues in Congress to join us in this effort to salute our U.S. Olympians.”

Their joint statement reflected their shared reasoning that, “[o]ur athletes work and sacrifice for years to reach the pinnacle of their sports and to proudly represent the United States of America in the Olympic games.” They continued, “[w]hen they’re standing on the podium, they should be savoring the moment – not calculating their taxes.” In addition, just in time for the then-upcoming election, Presidential Candidate Mitt Romney and President Barack Obama voiced their support for the bill. Senior Adviser to Romney, Eric Fehrnstrom, relayed that Romney “believes that there should be no taxation of the type that you’re describing on their hardware.” In addition, White House representatives confirmed that President Obama supports the bill. Press secretary Jay Carney confirmed that Obama would do “everything we can to support our athletes.”

While support for the bill grew throughout the 2012 Summer Olympic Games, there was also much negative
reaction to the bill, especially from those who understand the Internal Revenue Code and the potential implications of this bill. One critic, Alex Knight, a tax partner at an Atlanta accounting firm, has gone so far as to say that winning the Olympic Games is no different than winning Wheel of Fortune or the lottery, and thus should be treated the same for tax purposes. Most critics of the bill, however, have not trivialized the accomplishment of winning the Olympic Games but instead have attacked the implications of the bill. Matthew Gardner, at Citizens for Tax Justice, worries that the legislation would “add to the complexity and loopholes that everyone agrees are a problem.” He voiced his concerns that the bill would have a negative effect on the economy. “Our revenues are dwindling, the rich pay less and less in taxes every year, and the tax code needs reform yesterday. With this kind of opportunistic legislation, these lawmakers are part of the problem, not the solution.” The Tax Foundation also attacked the bill on the grounds that “[s]uch ad hoc exemptions to the tax code are precisely the problem. Far from addressing the fact that our tax code is a complicated and burdensome mess, Senator Rubio and Congressman Schock offer yet another unjustifiable loophole into the federal income tax code.”

While most critics of the bill acknowledged that this bill would add more loopholes to the Code, some go further to demonstrate the complexities of adding such loopholes. While the proposal itself is a very short addition to Section 74, modifying the tax code is a daunting task, which ultimately could lead to many additional pages in the Code. “It turns into a Christmas tree. Everybody’s hanging something on to it,” said tax attorney Charles Potter.

102. Simon, supra note 6.
103. Id.
104. Id.
105. Id.
108. Id.
109. Id.
Another critic has argued that the proposed bill should not pass because of the deep-rooted history of taxes prizes and awards; however, he does sympathize with Olympians. As an alternative, he suggests, “the athletic associations that put up these bonuses for medal winners should put up enough money to cover the taxes too. If it’s a $25,000 award, add in a third of that so that it’s $25,000 after taxes.” Implicit in this argument, however, is still the ultimate conclusion that these prizes and awards should be taxed.

IV. ARGUMENT

This bill is a patriotic attempt to honor our Olympians. However, the members of Congress who proposed this bill have failed to acknowledge the potential negative effects that it may produce. There are several reasons why Congress should not pass this bill: (1) All American citizens are bound by the rigid rules of the Internal Revenue Code, and Olympians should be no exception; (2) Olympians are not coming home to an “extra” tax burden, as it has been described by supporters of the bill; and (3) the bill is contrary to the nation’s goal to cure the deficit.

A. What makes Olympians more worthy of a tax benefit than other athletes, or more generally, than all American citizens?

Since 1986, when the Code underwent major amendments, all United States citizens have had to fulfill the requirements outlined in Section 74 in order to receive a tax exemption from a prize or award. As previously noted, the 1986 amendment to Section 74 added a fourth prong to a previously three-pronged test, which evidenced Congressional intent to further limit tax exemptions on prizes and awards. Athletes have rarely, if ever, succeeded on the claim that a prize or award given for an athletic achievement is excludable from gross income.

111. Id.
112. Id.
114. Id.
115. See Hornung v. Comm’r, 47 T.C. 428 (1967); Wills v. Comm’r, 48 T.C. 308
Horizontal equity is considered one of the most important principles of tax policy. The principle provides that similarly situated individuals should face similar tax burdens. The Olympic Tax Elimination Act would violate the principle of horizontal equity by favoring one group of people over another group of similarly situated people.

Other athletes who have represented the United States in global athletic competitions have not been offered tax breaks similar to the one that this bill proposes. Illustrative of the potential violation of horizontal equity is the tax treatment of World Cup athletes. Every four years, American soccer players compete in the World Cup. Like Olympians, they represent our nation when they compete in the tournament. In proposing the bill, Senator Rubio reasoned that Olympians deserve a tax break because they represent the United States when they participate in the Olympics. This reasoning should equally apply to soccer players who represent the United States when they participate in the World Cup, a worldwide athletic competition. However, Senator Rubio’s proposed bill does not suggest a special exemption for these athletes. Why does Senator Rubio choose only to favor Olympians? Both groups of athletes in the above example excel at the sports in which they participate, and both groups of athletes represent the United States in competitions against other nations.

Tax attorney Charles Potter has also illustrated the unfairness that this bill would cause. He pointed out that the winner of the Masters golf tournament must pay taxes based on the value of the green jacket that he is awarded. He also noted that the same rule applies to football players who win Super Bowl rings. This raises the question, “[w]hy should Miami Heat superstar LeBron James be taxed for winning the National Basketball Association championship but not for his Olympian exploits as a member of the U.S. (1967).

Dream Team?”

Several Congressmen have alluded to the idea that Olympians are noble representatives of the United States when they compete against citizens of other countries. However, to use this altruistic view of Olympians as support for a tax exemption is somewhat troubling. There are many Americans who have made significant contributions to our country, let alone the world, arguably in areas more influential than athletics, who are not exempt from Section 74’s strict requirements. Robert G. Edwards developed in vitro fertilization; Edward B. Lewis made discoveries concerning the genetic control of early embryonic development; and Joseph E. Murray and E. Donnall Thomas made significant discoveries “concerning organ and cell transplantation in the treatment of human disease.” These four people have all been awarded the Nobel Prize for their remarkable achievements in the field of Physiology or Medicine, all have subsequently had to abide by the four-prong test outlined in Section 74, and all have been subject to taxes on their Nobel Prizes. To give a tax benefit to Olympic athletes, but not to Nobel laureates, on the basis of their significant contributions to our nation would quite simply be unfair.

Section 74 creates an even playing field for all winners of prizes and awards, no matter how substantial or significant. To favor specific groups of citizens through special exceptions would be unfair, inequitable, and a violation of horizontal equity.

---

B. Olympians do not come home to an “extra” tax bill

In support of the proposed bill, several members of Congress have sympathized that Olympians should not have to pay an “extra” bill when they return home from the Olympic Games. This characterization of the tax burden as an “extra” bill is misleading. Ultimately, the award-winner has realized an accession to wealth and is therefore better off than he or she was before, even after paying taxes. As USA Today simplifies, “[a]nyone who gets a raise or a bonus, wins a raffle or a prize, or adds any income gets a larger tax bill, not an extra one.”

To understand the tax treatment of prizes and awards, it is beneficial to first provide a very brief and basic overview of how one’s tax liability is computed. The first step in computing the amount of one’s tax liability is the determination of gross income. Under Section 61 of the Code, gross income is defined as “all income from whatever source derived.” For most individuals, the basic items that are included in this definition are wages, salaries, interest, dividends, and rents. Section 74(a) expands the definition of gross income to include amounts received as prizes and awards. Once a taxpayer’s gross income is determined, the next step is to calculate the taxpayer’s adjusted gross income by deducting a set of items listed in Section 62. Once the taxpayer’s adjusted gross income has been determined, taxable income must be calculated. This is computed by deducting the personal exemptions of the taxpayer and his or her dependents, plus either (i) the standard deduction or (ii) “itemized” deductions. After the taxpayer determines his or her taxable income, the rate schedule must be applied to determine the tax liability. The final step is to offset the

tax with any credits that may be available and to determine whether an alternative minimum tax must be paid.  

Based on this brief description, it is clear that if any of the steps are altered by substituting different amounts, the tax liability is subject to change. It is therefore imperative to include “all income from whatever source derived,” in the computation of gross income to ensure an accurate end result.

The simple fact is that, when an Olympian wins an award for his efforts, he is still better off than he was before being rewarded. That award counts as “income from whatever source derived” and therefore must be included in the taxpayer’s gross income. Ultimately, the prize or award will increase the total tax liability of the Olympian.

With a monetary prize, it is obvious that even after taxes, the Olympian is wealthier than he was before he won. If, on the other hand, the prize is not monetary, but rather a medal or a material object, the taxpayer is obligated to pay taxes on the fair market value of the prize or award. If the taxpayer cannot afford the tax, he or she has the option of selling the medal. Initially, this seems both unfair and unrealistic, because it is impractical to expect every taxpayer to sell an earned trophy due to his inability to pay taxes on it. However, the Code makes it abundantly clear that any accession to wealth must be imputed to gross income in determining one’s tax liability.

The supposed unfairness, however, is mitigated by the fact that, in addition to receiving a medal, an Olympic champion is also awarded a cash prize in recognition of his or her achievements. A gold-medal winner is awarded $25,000; a silver-medal winner is awarded $15,000; and a bronze-medal winner is awarded $10,000. The fair market value of a gold medal is approximately $675; a silver medal is valued at $385; and a bronze medal is valued at $5.

using the applicable 2012 income tax rate schedule, an Olympic winner would be required to pay taxes totaling approximately $1,852.50 for gold, $525 for silver, and $25 for bronze, on the monetary value awarded.\footnote{Using I.R.C. (2012) Table 3 – Section 1(c) – Unmarried Individuals (Other Than Surviving Spouses and Heads of Households):}

When the fair market value of the medals is added to the taxpayer’s gross income, the Olympian’s tax burden merely increases from $1,852.50 to $1,953.75; $525 to $563.50; and $25 to $25.50, for gold, silver and bronze winners, respectively.\footnote{I.R.C. (2012) Table 3 – Section 1(c) – Unmarried Individuals (Other Than Surviving Spouses and Heads of Households) provides:}

The large cash prizes that Olympians receive are undoubtedly enough to cover the relatively minor tax burden that accompany the

</table>

The standard deduction in 2012 was $5,950. The personal exemption in 2012 was $3,800.

Gold monetary prize tax computation: $25,000 – 5,950 – 3,800 = 15,250
$870 + 15% of the excess over $8,700
$870 + (0.15)(15,250 – 8,700) = $1,852.50
Silver monetary prize tax computation: $15,000 – 5,950 – 3,800 = 5,250
10% of the taxable income
(0.10)(5,250) = $525
Bronze monetary prize tax computation: $10,000 – 5,950 – 3,800 = 250
10% of the taxable income
(0.10)(250) = $25

medals.

C. The proposed bill is contrary to the nation’s goal to reduce the deficit

Members of Congress are using this proposal for political backing. Just as the Summer Games ended, the electoral campaign began to pick up pace. Both President Obama and then-Presidential Candidate Mitt Romney acknowledged their support for the bill. 146 However, this bill would be contrary to the President’s goal to cut the nation’s deficit by means of the Internal Revenue Code. 147 When addressing his plans to mitigate the nation’s deficit problems, at a Press Conference in 2011, President Obama said, “[i]t would be nice if we could keep every tax break there is, but we’ve got to make some tough choices here if we want to reduce our deficit.” 148 He went on to explain, “[a]ny agreement to reduce our deficit is going to require tough decisions and balanced solutions.” 149 This bill starkly favors one small group of American citizens over the remaining population. Indeed, this could not have been what the President intended when he suggested balanced solutions.

This bill has the potential to set bad precedent and create a slippery slope for other proposals of similar nature. If Olympians become entitled to a tax benefit through passage of this bill, many other groups of people may also feel entitled to a similar tax benefit. Congress must respond to this bill in a manner that makes clear its intent to limit loopholes and preserve Section 74’s even playing field for all American citizens alike.

This bill, and the potential addition of other loopholes to Section 74 and throughout the Code, would contradict the

149. Id.
Nation’s efforts to reduce the deficit. Ed Kleinbard, a professor of law at the University of Southern California and former Chief of Staff of the U.S. Congress’s Joint Committee on Taxation, explains our deficit problem with specific regards to tax expenditures.\textsuperscript{150}

Tax expenditures are really spending programs, not tax rollbacks, because the missing tax revenues must be financed by more taxes on somebody else. Like any other form of deficit spending, a targeted tax break without a revenue offset simply means more deficits (and ultimately more taxes); a targeted tax break coupled with a specific revenue ‘payfor’ means that one group of Americans is required to pay (in the form of higher taxes) for a subsidy to be delivered to others through the mechanism of the tax system.\textsuperscript{151}

The basic take-away from Kleinbard’s explanation is that revenue needs to come from some source; if one group of Americans is given a tax break, then another group of Americans will have to make up for it.\textsuperscript{152} Applied to the issue at hand, if Congress enacts the proposed bill, Olympians will no longer provide a source of the revenue. While this may not seem substantial, every source, when taken as a whole, accounts for the nation’s deficit. More concerning is that this proposed bill opens up the risk of other loopholes, which in effect, would diminish other revenue sources. The loss of revenue sources will cause other groups of Americans to carry a larger tax burden.

Kleinbard has also examined the fluctuations of tax expenditures throughout the late 1900s.\textsuperscript{153} He notes that after climbing to an all-time high in the mid-1980s, tax expenditures then “fell because of the base broadening and rate reductions of the Tax Reform Act of 1986.”\textsuperscript{154} He goes on to say that tax expenditures reached a modern low in 1991.\textsuperscript{155} Looking at this timeline, it is evident that Congress, through the Tax Reform Act of 1986, aimed to reduce tax expenditures. The bill at issue would do just the opposite – it would increase tax expenditures by providing a new benefit to a new group of people. This bill has the potential of adversely

affecting our Nation's efforts to cure the deficit, and therefore should not be passed.

V. CONCLUSION

There are many reasons why the proposed bill should not be passed. Most importantly, the consistent application of Section 74 to all prize-winners must be continued. Olympic athletes are loved in our Nation, and rightfully so. However, there are many Americans who have made significant contributions to our society. To create an exception based on meritorious achievement just for Olympic champions would be to unfairly favor one group of Americans over the rest. Further, the tax that Olympic champions are subject to upon winning a prize or award is minor in proportion to the value of the award. An Olympic athlete would still be recognizing a substantial accession to wealth, even after the tax burden is deducted from his or her overall award. Finally, the potential results of enacting the proposed bill would be detrimental to our nation's deficit problem. Members of Congress have consistently prioritized the deficit as among the most prominent issues that our nation is currently facing. The most basic solution is to reduce tax expenditures; this bill does exactly the opposite.
