I. INTRODUCTION

When a couple has a child together, the parents are primarily responsible for tending to the child’s needs.\(^1\) When an unmarried couple—who either never married, are separated, or are divorced—has a child or children together, then typically arrangements are made to ensure that the child or children are supported financially.\(^2\) The financial arrangements to support a child or children are often referred to as child support.\(^3\) Child support can be agreed upon or it can be ordered by the court.\(^4\) However, a parent who becomes delinquent on child support payments could unknowingly face hundreds of dollars in penalty interest. There is no statutory requirement in Florida that obligors—the parents who are obligated to pay child support under a court order or by other agreement—receive periodic notices of delinquency.\(^5\) There also is no statutory requirement in Florida that the interest rate applied to the delinquent amount, the amount of interest that has accrued, or an estimate of the amount of interest likely to accrue, be periodically provided in writing to obligors. Parent-obligors should be informed periodically of the interest rate and the amount of penalty as a matter of constitutional right. In the spirit and under the principles of consumer protection, parent-obligors also should be provided

\(^1\) Stephanie Giggetts, Annotation, Application of Child-Support Guidelines to Cases of Joint-, Split-, or Similar Shared-Custody Arrangements, 57 A.L.R. 5TH 389, § 2(a) (1998 & Supp. 2013) (“Parents have a mutual duty to support their children.”). See also Exec. Order No. 12,953, 60 Fed. Reg. 11,013 (Feb. 27, 1995) (“Children need and deserve the emotional and financial support of both their parents.”).

\(^2\) Giggetts, supra note 1, at § 2(a). Child support guidelines are used to determine the amount of child support a parent must pay. “Most child-support guidelines, however, contemplate that one parent will have primary physical custody of the child and thus require the noncustodial parent to make child-support payments to the custodial parent. Some states have included specific provisions for cases where custody is equally shared and have developed worksheets to be used in such a situation.” Id.

\(^3\) BLACK’S LAW DICTIONARY 113 (4th ed. 2011).

\(^4\) FLA. STAT. § 61.14(1)(a) (2016). “While the duty to pay child support may arise from common law or statute, contract, or a confusion of both, . . . Florida statutory law and contract law are separate and distinct sources for the obligation. Contracts regarding the support of minor children remain subject to the plenary power of the state to control, regulate and discretion to enforce.” Burkley v. Burkley, 911 So. 2d 262, 267 (Fla. 5th Dkt. Ct. App. 2005) (internal citations omitted).

notice so they can be informed of the potential impact of penalty interest.

Parents who become delinquent on court-ordered child support payments are charged interest on the delinquent amount.\textsuperscript{6} In Florida, the interest is calculated quarterly.\textsuperscript{7} However, these parent-obligors are likely unaware of the amount of penalty interest assessed because the clerk, or local depository, is not required to specify the potential impact that interest will have on the delinquent amount.\textsuperscript{8} The delinquency notice informs the obligor of several things: (1) the amount of the delinquency; (2) that the delinquency becomes a judgment as a matter of law; (3) that the judgment will be made for the amount of the delinquency and “all other amounts which thereafter become due and are unpaid, together with costs and a service charge of up to $25, for failure to pay the amount of the delinquency[;]” and (4) that the obligor has a right to contest the impending judgment.\textsuperscript{9} Additionally, the delinquency and the subsequent penalty interest may be submitted to credit reporting agencies.\textsuperscript{10}

Obligors should be informed of the potential amount of the penalty interest. Disclosing this information to obligors would advance the broad concept of constitutional due process rights, propel the principle of notice that underlies consumer protectionism, and may help improve the efficacy of the Florida statute by positively impacting the collection of arrears or the past due amount.\textsuperscript{11} In a federally-funded report published in 2007 that analyzed arrears in nine states, including Florida, two broad strategies for arrears management were aimed at either preventing arrears from accruing or managing existing arrears.\textsuperscript{12} “An effective arrears management plan will focus on interventions that address

\begin{itemize}
\item [\textsuperscript{6}] FLA. STAT. § 61.14(6)(b)(1) (2016).
\item [\textsuperscript{7}] FLA. STAT. § 55.03 (2016).
\item [\textsuperscript{8}] FLA. STAT. § 61.14(6)(b)(1) (2016). Once an obligor is 15 days delinquent, the local depository is required to serve notice on the obligor and include information about the amount of the delinquency. \textit{Id}.
\item [\textsuperscript{9}] FLA. STAT. § 61.14(6)(b)(1)(a-c) (2016).
\item [\textsuperscript{10}] FLA. STAT. § 61.14(6)(b)(1)(d) (2016). In the delinquency notice, the obligor is informed that the local depository has the authority to release information about the delinquency to more than one credit reporting agency. \textit{Id}. However, the statute does not specify the information that could be released.
\item [\textsuperscript{12}] \textit{Id}. at 80, 87.
\end{itemize}
the factors that contribute to arrears growth the most.13 According to the report,

It is also important to recognize that many factors contribute to arrears and thus multiple strategies are needed to contain them. No single strategy is sufficient to manage arrears. Although the assessment of interest on a routine basis is probably the single most important factor contributing to arrears, clearly other factors contribute to arrears since many states do not assess interest on a routine basis.14

In addition to the possibility of the state maximizing its arrears management program, obligors also could benefit by reducing the negative impact on their credit scores when they are able to avoid paying penalty interest.

Published information devoted exclusively to Florida’s child support arrears program is extremely limited. Section II of this Article will discuss arrears management strategies and why Florida could benefit from implementing such strategies. Section III of this Article will discuss substantive due process rights and the intersection of those rights and the impact of accrued interest on judgments. Section IV will explore how obligors are entitled to consumer protection principles and practices. Section V suggests legislation that Florida should consider.

II. FLORIDA SHOULD IMPLEMENT PROGRAMS TO MORE EFFECTIVELY MANAGE ITS CHILD SUPPORT ARREARS PROGRAM

Past due child support obligations become judgments.15 Consequentially, these judgments accrue interest, which likely contributes to the growth of arrears.16 Interest on the arrears is probably the largest factor that contributes to arrears growth.17 Florida should examine ways to better manage its arrears program and to better explain to obligors the interest on arrears.

A. Purpose of Child Support: It is for the Children

The purpose of child support is to provide income to dependents who are incapable of providing for themselves.18 Child

---

13 Id. at 87–88. Some of the strategies include providing accurate information about the amount owed in arrears, revising the interest policy, establishing an amnesty program, and creating a compromise program. Id.
14 Id. at 90.
16 Fla. Stat. § 55.03(2) (2016).
17 Sorensen et al., supra note 11, at 55.
18 See generally Rana Holz, Child Support, in FLA. PROCEEDING AFTER DISSOLUTION OF MARRIAGE § 12 (7th ed., 2005). See also, Evans v. Evans, 595 So. 2d 988, 990 (Fla. 1st
support “is a right that belongs to the child.” It is an obligation that is shared by both parents, not an imposition on one parent by another. The court may order either parent or both parents who have an obligation to the child to pay support to the other parent.

Federal law requires states to create and enforce child support obligations. Federal law also requires states to establish guidelines for child support. The amount that a parent must pay is established using child support guidelines. Consequently, federal law also mandates that states have procedures in place to establish penalties for parents who fail to pay child support. To comply with federal mandates, Florida implemented statutes to govern child support obligations and the legal consequences of failing to meet those obligations. Failure to pay child support obligations may result in civil penalties. The Florida legislature also established criminal penalties for failure to pay child support. The state found
“that existing statutory provisions for civil enforcement of support have not proven sufficiently effective or efficient in gaining adequate support for all children.”

When civil penalties do not work, then criminal penalties may be sought.

The Florida judiciary has taken notice of the difficulty of child support enforcement. “The enforcement of child support has become a major governmental concern . . . . It is a problem fueled in part by the increasingly transient nature of our society.” The judicial branch has an interest in the enforcement of its court orders, and the legislative branch has an interest in achieving fiscal efficiency. “All branches of government have a public policy interest in the maintenance and support of minor children.”

B. Interest Accumulates on Arrears, Precipitates Arrears Growth, and Complicates Arrears Management Programs

Past due obligations, or arrears, accrue interest in the same way other civil judgments do. In 1986, Congress amended the Social Security Act and ordered all past due child support to become judgments by operation of law. “Since most states require that interest be charged on judgments, many states began to charge interest on child support arrears after this legislation was enacted.” Florida is one of the states that charges interest on judgments.

From a policy perspective, a state should collect interest on child support arrears to compensate the obligee, or custodial parent, for the lost time value of money. However, assessing interest on
arrears contributes significantly to the growth of arrears. The primary factor that has caused arrears to grow dramatically has been the assessment of interest on a routine basis. Florida was among nine states included in a study of large states that assess arrears. According to the study, states that charged interest on arrears experience far more significant growth in arrears than states that do not charge interest. Between 1987 and 2006, states that charged interest on arrears saw the size of their arrears grow from $5.4 billion to $58.7 billion, a substantial increase of $53.3 billion, or 987 percent, whereas states that did not charge interest saw less growth—from $2.8 billion to $19.5 billion, an increase of $16.7 billion, or 596 percent.

The main culprit for the growth in arrears was the interest that was assessed. Between the 1990s and the beginning of the next decade, assessing interest on arrears “was probably the single biggest factor that contributed to arrears growth.” Technology also buoyed the growth of tacking on interest. “Many states began to assess interest on a routine basis in the 1990s, as their computer systems could manage to calculate and track interest.”

---

40 Sorensen et al., supra note 11, at 55.
41 Sorensen et al., supra note 11, at 8, 55. The conclusion was based on examining a 15-year period, from 1991 to 2006. Other major factors that contributed to growing arrears were non-compliance with current child support orders and low payment rate on arrears. Sorensen et al., supra note 11, at 54. Incarceration of the obligor parent serves as an accelerant for child support owed. Eli Hager, For Men in Prison, Child Support Becomes a Crushing Debt, THE WASHINGTON POST, https://www.washingtonpost.com/politics/for-men-in-prison-child-support-becomes-a-crushing-debt/2015/10/18/e751a324-5bb7-11e5-b38e-06883aaca64_story.html (last visited May 10, 2016).
42 Sorensen et al., supra note 11, at 1. The nine states include: Arizona, Florida, Illinois, Michigan, New Jersey, New York, Ohio, Pennsylvania, and Texas. Selected because of their size, these states collectively held about 40 percent of the nation’s arrears at the time the data was extracted between 2003 and 2004. At that time, Florida had $3.83 billion in arrears. Sorensen et al., supra note 11, at 14–15.
43 Sorensen et al., supra note 11, at 55.
44 Sorensen et al., supra note 11, at 55.
45 Sorensen et al., supra note 11, at 55.
46 Sorensen et al., supra note 11, at 55.
47 Sorensen et al., supra note 11, at 55. In this study, Florida reportedly charges no interest on arrears; however, it is unclear whether that interest policy only applies retroactively to arrears. Sorensen et al., supra note 11, at 57. Florida does not charge interest on retroactive support. Nat’l Conference of State Legislators, supra note 35. However, Florida charged a twelve percent annual interest rate on judgments between 1981 and 1994, and it charged anywhere from an eight percent to eleven percent annual interest rate between 1995 and 2011. Jeff Atwater, Florida’s Chief Financial Officer, Historical Judgment Interest Rates, FLA. DEP’T OF FIN. SERVS., http://www.myfloridacfo.com/Division/AA/Vendors/JudgmentInterestRates.htm#U-
charge interest on a regular basis have a larger increase in arrears than states that do not.\textsuperscript{48}

Although there have not been any recently published reports exclusively devoted to Florida’s arrearage management program, Florida was included in a federal study that also captured the actions of eight other states that were working to manage their arrears.\textsuperscript{49} Collectively, the states have implemented programs to prevent the accumulation of arrears and help manage existing arrears.\textsuperscript{50}

To prevent the accumulation of arrears, some states have implemented programs to “set realistic orders,” “increase parental participation in the order establishment process,” “reduce retroactive support,” “implement early intervention strategies,” and “increase review and modification.”\textsuperscript{51} One option to help set realistic orders is a provision for low-income obligors.\textsuperscript{52} In Florida, low-income obligors may get a reduction in child support.\textsuperscript{53} Depending on the circumstances, the court may modify child support obligations if the parents’ combined net monthly income is less than the minimum guidelines.\textsuperscript{54} Another early intervention strategy intended to prevent child support delinquency is frequent communication with the obligor.\textsuperscript{55} Some states use phone calls, letters, and emails to remind the non-custodial parent to make a

\begin{footnotesize}
\begin{enumerate}
  \item Sorensen et al., \textit{supra} note 11, at 55.
  \item Sorensen et al., \textit{supra} note 11, at 80.
  \item Sorensen et al., \textit{supra} note 11, at 80.
  \item Sorensen et al., \textit{supra} note 11, at 80–86. The states have tried numerous strategies, but only these six were discussed. Some of the strategies were identified by state. Sorensen et al., \textit{supra} note 11, at 80–86.
  \item Sorensen et al., \textit{supra} note 11, at 81–82. The other strategies include using (New York) state income tax returns to help determine child support orders, using databases that hold information about whether an obligor is institutionalized or receiving certain types of federal financial benefits, presuming income is at minimum wage, setting orders at twenty-five to fifty dollars monthly, and waiving standard child support guidelines for low-income obligors. “Nearly all of the study states have a low-income provision in their state child support guidelines, which aims to reduce child support order amount for low-income obligors.” Sorensen et al., \textit{supra} note 11, at 81.
  \item Sorensen et al., \textit{supra} note 11, at 82.
  \item Sorensen et al., \textit{supra} note 11, at 83.
\end{enumerate}
\end{footnotesize}
payment or provide notice of account status issues.\textsuperscript{56}

Florida gives instructional information to the non-custodial parent about its obligation and how to remit payments. Additionally, the state conducts orientation appointments to review the order, the enforcement process, and the consequences for non-compliance.\textsuperscript{57} In July 2011, Florida child support staff opened an office on a Saturday in Lakeland, Florida “to resolve pending driver’s license suspensions” as a result of child support delinquency.\textsuperscript{58} As a result, the state collected nearly $37,000 from 115 cases.\textsuperscript{59}

To help manage existing arrears, the states discussed in the federal study also established procedures to provide accurate information about arrears owed, to increase arrears collections, to revise interest policies, to implement arrears amnesty programs, to implement arrears compromise programs, and to review non-paying arrears cases for possible case closure.\textsuperscript{60} Arizona, for example, developed a web-based portal so that customers can access current information, including arrears.\textsuperscript{61} Two other states revised their interest policies.\textsuperscript{62} Michigan began using a simple rate, instead of a compounded rate, and applied arrears payments to the principle first.\textsuperscript{63} Both of these changes were made to reduce the growth rate of arrears.\textsuperscript{64}

\textsuperscript{56} Sorensen et al., \textit{supra} note 11, at 84. Pennsylvania has used all three types of communications with child support customers. Sorensen et al., \textit{supra} note 11, at 84.

\textsuperscript{57} Sorensen et al., \textit{supra} note 11, at 84. In 2012, Florida implemented a new web-based computer system to automate routine child support activities, including customer service. FLA. DEP’T OF REVENUE, 2012 ANNUAL REPORT 5–6 (2012), \textit{available at} http://dor.myflorida.com/dor/report/2012_annual_report.pdf (last accessed May 10, 2016). The state also launched a pilot program for web chat with customers. Id. at 5.

\textsuperscript{58} Sorensen et al., \textit{supra} note 11, at 14.

\textsuperscript{59} FLA. DEP’T OF REVENUE, \textit{supra} note 57, at 5. Florida collected $1.6 billion, an increase of 2.1 percent over the prior year, in child support in its fiscal year ending in 2012. FLA. DEP’T OF REVENUE, \textit{supra} note 57, at 5. However, the report does not address arrears specifically.

\textsuperscript{60} Sorensen et al., \textit{supra} note 11, at 87–89. The states have tried numerous strategies, but only these six were discussed. The strategies were not identified to the individual states. However, at the time of the study, Arizona was exploring a web-based program that calculated the arrears. Sorensen et al., \textit{supra} note 11, at 87. “The tool will allow custodial and non-custodial parents to easily obtain timely and accurate information about the amount of arrears owed . . . .” Sorensen et al., \textit{supra} note 11, at 87. Since then, Arizona has released its online tool. \textit{See Child Support Calculator Information}, Arizona Supreme Court, http://www.azcourts.gov/familylaw/Child-Support-Calculator-Information (last accessed May 12, 2016).

\textsuperscript{61} Sorensen et al., \textit{supra} note 11, at 87.

\textsuperscript{62} Sorensen et al., \textit{supra} note 11, at 87.

basis may want to review their interest policy to ensure that it is consistent with the goals of the program.\footnote{65}{Sorensen et al., supra note 11, at 87.}

C. Florida Should Consider the Most Effective Ways to Manage Arrears

First, Florida could improve the efficacy of its arrears management program by examining its program prior to implementing certain strategies, such as better communicating the interest and arrears owed.\footnote{66}{Sorensen et al., supra note 11, at 90.} There may be no single implementation that will successfully manage an arrears program. However, a healthy program will focus on interventions that address the factors that contribute to arrears growth the most. Thus, it behooves states to understand what drives arrears growth in their state. . . . It is also important to recognize that many factors contribute to arrears and thus multiple strategies are needed to contain them. No single strategy is sufficient to manage arrears.\footnote{67}{Sorensen et al., supra note 11, at 90.}

Second, Florida should consider more effective ways of communicating the interest and arrears owed. Obligors who are bound by Florida law have arrears that are subject to complex calculations, which may contribute to the lack of awareness about the impact of the interest accruing.\footnote{68}{Reiss & Brawer, supra note 39, at 54.} Under Florida law, calculating interest is difficult in a 365-day calendar year, and it is even more complicated for a leap year.\footnote{69}{Fla. Stat. § 55.03 (2016).} "[A] logistical nightmare is presented for the family law practitioner, especially considering the impact that the leap year has on the process."\footnote{70}{Reiss & Brawer, supra note 39, at 54.} The calculation is complicated because it must be performed quarterly.\footnote{71}{Fla. Stat. § 55.03 (2016).} Florida amended its laws in 2011 and implemented this new interest calculation that went into effect in July 2011.\footnote{72}{Reiss & Brawer, supra note 39, at 54.}

Before the amendment, the interest was calculated by applying
a daily interest rate. Now, the interest is calculated quarterly “by averaging the discount rate of the Federal Reserve Bank of New York for the preceding twelve months, then adding 400 basis points to the averaged federal discount rate.” Under the revised interest calculation statute, “[t]he relatively simple calculation became complicated . . . .”

If the calculation confounds practitioners, then the likelihood that it is even more confounding for the lay obligor is high. The impact of statutory interest should be communicated clearly in plain language to help improve the collection of arrears and help obligors avoid paying an exorbitant penalty because the interest tab was ticking.

Although Florida provides information to non-custodial parents about their obligations and, in some cases, reviews implications of non-compliance, the state should consistently and regularly communicate with non-custodial parents to help prevent interest accumulating on arrears and, consequently, arrearage growth.

III. OBLIGORS HAVE A SUBSTANTIAL DUE PROCESS RIGHT TO BE INFORMED OF THE IMPACT OF THE INTEREST ON JUDGMENTS

Obligors who are delinquent in court-ordered child support payments may be entitled to know the potential impact of the interest rate on the delinquency as a matter of constitutional right. While an obligee has a right to collect a judgment, the obligor also may have rights under due process.

A. Constitutional Due Process Protects Individual Rights

The U.S. Constitution provides that “[n]o State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law.” According to the Supreme Court, “governmental benefits to which recipients have a ‘statutory entitlement’ are a form of property and,
therefore, . . . may not be discontinued without due process of law." For example, in *Goldberg v. Kelly*, the Court ruled that welfare benefits were a property right that required due process before termination. Sometimes a property right can be an entitlement to a job. Wages have been also defined as property that are subject to constitutional protection. Therefore, individuals have a right to due process when their constitutional interest to wages is being challenged.

There are two types of due process—procedural and substantive. Procedural due process is an opportunity to be heard, including when the deprivation of property is involved, and is "one of the fundamental requisites of due process." It involves a notice and a hearing *prior* to action by the government or an agency. The right to notice and a hearing, in order to serve its full purpose, must be granted at a time when the deprivation can still be prevented. No later hearing or damage award can undo the fact that the arbitrary taking that was subject to the right of procedural due process has already occurred. This often-cited rationale indicates that some method of notice and hearing should be implemented either before the withholding takes place or immediately thereafter.

In 1983, the U.S. Supreme Court struck down a Florida (and Pennsylvania) law that enabled private parties to seize property without prior notice or hearing even though the deprived party had...

---

80 *Goldberg v. Kelly*, 397 U.S. 254 (1970) (concluding that welfare benefits are an entitlement granted by statute and deprivation of such right requires due process).
81 "The Court . . . relies upon the Fourteenth Amendment and in effect says that failure of the government to pay a promised charitable installment to an individual deprives that individual of his own property, in violation of the Due Process Clause of the Fourteenth Amendment." *Id.* at 275 (Black, J. dissenting).
82 Cleveland Board of Education v. Loudermilk, 470 U.S. 532, 538 (1985) (holding that the property right to continued employment was created by Ohio statute). "The point is straightforward: the Due Process Clause provides that certain substantive rights—life, liberty, and property—cannot be deprived except pursuant to constitutionally adequate procedures. The categories of substance and procedure are distinct." *Id.* at 541.
84 Neagli & Troutman, *supra* note 82, at 304 (quoting *Armstrong v. Manzo*, 380 U.S. 545, 552 (1964)).
85 Neagli & Troutman, *supra* note 82, at 304 (emphasis added).
immediate post-seizure opportunities to retrieve the property. However, the Court said that no matter how brief the deprivation of property, “[a]ny significant taking of property by the State is within the purview of the Due Process Clause.”

Analogous to the procedural due process right to notice and a hearing, obligors should be notified specifically about the amount of interest charged on child support arrears, especially prior to the state reporting the information to credit reporting agencies. The notification could prevent an obligor from receiving negative information on his or her credit report, which could impact the obligor’s ability to secure employment, housing, and financing. Obligors also should be informed of the potential impact of the interest and the interest rate on arrears for the same reasons.

Substantive due process is a concept that explores whether the government was justified in depriving the person of life, liberty, or property. This concept of due process “looks to whether there is a . . . good enough reason for such deprivation.” Historically, successfully asserting a substantive due process claim has been challenging, especially for plaintiffs claiming a due process violation of a right that is not enumerated in the Constitution. However, the Courts have extended substantive due process rights to unenumerated rights, including the right to contract and the right of parents’ control in the upbringing of children. More recently, though, the Court has taken a narrow view of types of rights that fall into a due process claim. Nevertheless, “[s]ubstantive due process can be used any time the government takes away life, liberty or property.”

A right to be informed about the specific impact of the interest or the interest rate on a judgment resulting from delinquent child support is not an enumerated right. However, obligors may

---

86 Fuentes v. Shevin, 407 U.S. 67, 67 (1972) (concluding that the state deprives a person of property when officials seize a piece of property in exchange for the surrender of another piece of property, no matter how brief the deprivation). Until then, Florida law allowed “the summary seizure of goods or chattels in a person’s possession under a writ of replevin.” Id. at 69.

have a substantive due process right to be informed of such impact because the government is impacting the obligors’ liberty and property.

B. Obligors May Challenge Judgments under the Due Process Clause

Because child support orders may involve seizing a portion of obligors’ earnings, a constitutional due process challenge—specifically a procedural due process challenge—can arise.94 “Recently, this constitutional provision has been the basis for a spate of civil actions in federal courts throughout the country challenging state procedures” on a variety of issues, including postjudgment collection processes.95 Specifically, parties have battled about the type of postjudgment notice that is provided to obligors. “These cases raise questions regarding the type of notice and hearing that must be afforded postjudgment debtors (or child support obligors) in order to comply with modern era views of due process.”96

The due process challenges are available to obligors who voluntarily agreed to pay child support. They are equally available to non-child support postjudgment debtors. Moreover, the child support obligor and the postjudgment debtors are equally positioned to pursue due process challenges because their judgments are functions of the operation of law.

A child support obligor would seem to be in a position identical to that of a postjudgment debtor for purposes of due process analysis. At some time in the past, each had an opportunity to contest in court whether he or she owed an obligation to another individual and, in each case, a court determined that the debtor or obligor was, indeed, liable. Although an obligor, unlike a debtor, may have entered into a voluntary agreement to pay child support, this does not diminish the existence of the obligor’s liability or the fact that it has been determined by a court and so is binding as a matter of law.97

Therefore, “an obligor is clearly not in any way in a more favorable position than an ordinary judgment debtor.”98

C. Postjudgment Due Process Rights Have Evolved

The U.S. Supreme Court’s discussion on postjudgment due

95 Motz & Baida, supra note 94, at 61.
96 Motz, supra note 94, at 61–62 (internal citation omitted).

98 Motz, supra note 944, at 90 n.5.
process rights began almost a century ago. In 1924, the Court declined to extend postjudgment due process rights in *Endicott-Johnson Corp. v. Encyclopedia Press, Inc.* because a defendant who had his or her day in court is not entitled to a subsequent notice of a hearing or action. Unless there was a statutory requirement to provide notice before the property was taken to satisfy a judgment, the Court said there was no reason to give postjudgment notice.

In 1946, the Court seemed to extend its position when it upheld a New York judgment that granted past due alimony and interest, although the respondent had no notice of the subsequent hearing or judgment. In 1967, the Court declined to overturn *Endicott* when the issue arose in an Arizona case. “[T]he Arizona Supreme Court had upheld as constitutionally sufficient a state procedure that provided for notice of the underlying debt, but for no additional notice of intent to execute.” The Court ultimately dismissed the case, so *Endicott* was left unresolved.

In 1976, the Court changed the way that it analyzed postjudgment due process claims. It established a three-prong balancing test in *Mathews v. Eldridge* to examine constitutional due process challenges. Soon, lower courts began applying the three-part test to postjudgment due process challenges.

That same year, a Florida district court applied the *Mathews* balancing test specifically to a postjudgment garnishment procedure, holding in *Brown v. Liberty Loan Corp.* that the statutes

---

100 Johnson Corp. v. Encyclopedia Press, Inc., 266 U.S. 285, 288 (1924). The Court held that the “established rules of our system of jurisprudence do not require that a defendant . . . have a further notice and hearing before supplemental proceedings are taken to reach his property in satisfaction of the judgment.” *Id.* at 288.

101 *Id.* at 288 (holding that the notice is not essential to advance justice). *But cf.* Hutchinson v. Cox, 784 F. Supp. 1339, 1343 (S.D. Ohio 1992) (recognizing that the due process analysis in *Endicott-Johnson* had long been abandoned by the U.S. Supreme Court).

102 Griffin v. Griffin, 327 U.S. 220, 235 (1946). “Due process does not require that notice be given before confirmation of rights theretofore established in a proceeding of which adequate notice was given.” *Id.* at 233–34.

103 Hanner v. Demarcus, 390 U.S. 736, 741 (1967) (Douglas, J., dissenting) (noting that since *Endicott*, there has been an expansion of the scope of notice required).

104 Motz, *supra* note 94, at 63 (internal citation omitted).

105 Mathews v. Eldridge, 424 U.S. 319, 335 (1976). The three balancing factors included: (1) “the private interest that will be affected by the official action[,]” (2) “the risk of an erroneous deprivation of such interests through the procedures used, and the probable value, if any, of additional or substitute procedural safeguards[,]” and (3) “the Government’s interest, including the function involved and the fiscal and administrative burdens that the additional or substitute procedural requirement would entail.” *Id.*
violated due process after it examined the private and governmental interests. The Fifth Circuit overturned the district court because the state’s interests outweighed the debtor’s interest, and it upheld Florida’s postjudgment garnishment procedures as constitutional. It was the first court to apply the Mathews balancing test. After Brown, a Michigan court in 1976 also upheld that postjudgment attachment procedures were constitutional.

However, the courts began shifting in 1980, when the Third Circuit declared Pennsylvania’s post-garnishment procedures unconstitutional in Finberg v. Sullivan. The Court “held that the challenged Pennsylvania postjudgment garnishment procedures did not adequately protect a judgment debtor’s interests, nor fairly accommodate the interests of both debtors and creditors.” Finberg represents the first of a new, but increasingly long, line of cases in which various postjudgment garnishment procedures have been held unconstitutional.

But the trend to require detailed notice seemingly slowed in the mid-1980s when two federal district courts ruled on the same New York statute governing postjudgment procedures—before it was revised and after it was revised. In 1982, New York law “provide[d] no requirement that the judgment debtor be notified of the enforcement action. Notice of the seizure, or the attempt to seize, property of a debtor is a fundamental element of due process.” The Court in the Southern District of New York, thus,

---

107 Id. at 1363, 1369. “For instance, [the district court] does not consider the state’s interest in facilitating the enforcement of judgments obtained in its courts or the creditor’s interest in satisfying a judgment from a debtor’s assets. Given proper weight, those interests appear to outweigh the debtor’s interests.” Id.
108 Motz, supra note 94, at 66.
110 Motz, supra note 94, at 67.
111 Motz, supra note 94, at 67 (noting in Finberg that “[t]hough acknowledging that predeprivation notice and a hearing were not required by due process, the court determined that the judgment debtor’s “compelling” interest in asserting exemptions in order to regain use of money in her seized bank account demanded a “prompt” postseizure hearing). Finberg v. Sullivan, 634 F.2d 50 (3d Cir. 1980).
112 Motz, supra note 94, at 67–68.
113 Motz, supra note 94, at 73.
ruled the statute unconstitutional. Two years later, after the statute was amended to include notification to debtors of (1) only some of the exemptions to which they might be entitled, and (2) debtors’ right to consult a lawyer, the Court in the Eastern District of New York ruled that the statute satisfied the Due Process Clause of the Fourteenth Amendment.

While the courts have been inconsistent in their rulings on due process requirements for postjudgment procedures, the minimum amount of notice theme seems to be holding. The courts have not been inclined to heighten the requirement for notice because there is no constitutional requirement to do so. “Judgment debtors need only be afforded notice that . . . [some] exemptions may be available and that they have a right to contest a garnishment . . . . Such notice is entirely adequate to protect the postjudgment debtors rights and, accordingly, comply with the requirements of due process.”

Although there may be no constitutional requirement to be particularly elaborate on judgment debtors’ notice, there is no constitutional prohibition from doing so. Further, states may benefit practically by heightening their level of postjudgment communication to debtors.

IV. OBLIGORS ARE ENTITLED TO DISCLOSURE UNDER CONSUMER PROTECTION PRINCIPLES

In many ways, obligors are similar to consumers and should be afforded the same spirit of transparency that exists in consumer protection. Both are subject to legal arrangements that require payments be made to a creditor; thus, both are entitled to consumer protection laws and practices.

Consumer protection is a concept that fosters disclosure, notification, and education. The strength of consumer protection is based on transparency, particularly in financial regulation. Transparency is at its peak when relevant information is made available to consumers and anyone else who may act on their behalf. The relevant information is made available through

116 McCahey v. L.P. Investors, 593 F. Supp. 319, 329 (E.D.N.Y. 1984) (concluding that judgment debtors in this context are entitled to notice of both the creditor’s actions and exemptions to which they may be entitled, and must be afforded a prompt opportunity to challenge the creditor’s enforcement and to assert their exemptions).
117 Motz, supra note 94, at 74.
119 Schwarcz, supra note 118, at 394. “A central goal of financial regulation is to
disclosures, or notices, to better inform consumers.\textsuperscript{120} It also helps promote accountability.\textsuperscript{121}

Congress recently expanded its protection of consumers, including potential obligors, by establishing the Consumer Financial Protection Bureau.\textsuperscript{122} The bureau is designed to “heighten government accountability” and be responsible for overseeing the enforcement of laws that govern consumer financial products and services.\textsuperscript{123} The bureau promotes transparency as one of its core values because “[b]eing transparent and open to the public encourages greater accountability.”\textsuperscript{124}

The bureau manages and enforces laws that govern “providers of consumer financial products and services” that otherwise are not subject to routine federal oversight.\textsuperscript{125} Although the agency had the authority to enforce laws, the agency was challenged to “fill in the gap” in some of its enforcement-related procedures, particularly with pre-enforcement.\textsuperscript{126} Such procedures are encouraged because proponents argue they lead to efficiency and support the credibility of the enforcement process.\textsuperscript{127} The “consultative process” helps would-be defendants avoid possible charges.\textsuperscript{128} One such procedure, known as the “Wells process,” is used by the Securities and Exchange Commission (“SEC”).\textsuperscript{129} Soon after its inception, the bureau was encouraged to adopt a similar pre-enforcement model.\textsuperscript{130} The process begins with a notice that identifies particular promote markets that are more transparent for consumers and retail investors.”\textsuperscript{9} Schwarcz, supra note 118, at 394.

\textsuperscript{120} Schwarcz, supra note 118, at 400. “Many consumer financial protections are designed to deliver relevant information to individuals in order to improve their financial decisionmaking.” Schwarcz, supra note 118, at 400.

\textsuperscript{121} Schwarcz, supra note 118, at 394.

\textsuperscript{123} CONSUMER FIN. PROT. BUREAU, Creating the Consumer Bureau, http://consumerfinance.gov/the-bureau/creatingthebureau/ (last visited May 16, 2016).

\textsuperscript{130} Mogilnicki & Perla, supra note 122, at 2.
charges the SEC is considering and provides the recipient with a chance to respond.\textsuperscript{131} The notice, along with the opportunity to respond, is the consultative process that proponents argue benefits the enforcement procedure and provides due process.\textsuperscript{132}

Likewise, Florida should adopt a similar pre-enforcement model. Although the pre-enforcement process would apply to postjudgment debtors who are delinquent on their child support payments, the pre-enforcement process could help the state be more efficient in collecting arrears. The model would include providing specificity in its delinquency notices, especially the potential interest that will accrue on the delinquency, as a pre-enforcement measure that would help improve the efficacy of arrears management. This type of notice and transparency—two factors of consumer protection—could significantly enhance an arrears management program.

A. The Balance Between the Obligee’s Right to Collect a Judgment and the Obligor’s Due Process Rights is Tethered to Consumer Protection Laws and Principles

The intersection of judgment obligors and consumers is evident in federal regulations that protect the credit of consumers.\textsuperscript{133} Under the auspices of consumer credit protection, federal law restricts garnishments of parents who are obligated to pay child support; therefore, obligors are consumers and should be given similar notices and disclosures that are provided to consumers.\textsuperscript{134} The disclosures could improve the efficacy of regulation if properly executed.\textsuperscript{135}

One of the reasons that obligors are consumers is because a consumer-focused federal regulation applies to obligors.\textsuperscript{136} The Consumer Credit Protection Act limits the amount of money that can be withheld from an obligor’s pay.\textsuperscript{137} Generally, the maximum amount that may be garnished is no more than twenty-five percent of disposable income or any amount greater than thirty times the

\textsuperscript{131} Mogilnicki & Perla, supra note 122, at 4.
\textsuperscript{132} Mogilnicki & Perla, supra note 122, at 2.
\textsuperscript{133} 15 U.S.C. § 1673 (2016). Federal law restricts garnishments as part of Title 15, Chapter 41 that regulates consumer credit protection. \textit{id.}
\textsuperscript{134} \textit{id.}
\textsuperscript{135} Schwarcz, supra note 118, at 401. Examples of successful mandatory disclosures include nutritional food labeling, ATM fees, payday loans, mortgages, and consumer safety. \textit{id.} (internal citations omitted).
federal minimum hourly wage. The restriction was created because “[t]he unrestricted garnishment of compensation . . . encourages the making of predatory extensions of credit.” Congress wanted to discourage job loss and the consequential impact on interstate commerce. Prior to passing this portion of the Act, Congress wanted to correct “[t]he great disparities among the laws of several [s]tates relating to garnishment [that] have . . . frustrated the purposes thereof in many areas of the country.” Because the federal government protects obligors’ wages under the shield of consumer credit protection, obligors are considered to be consumers and are entitled to consumer protections.

B. The Interest Rate on Arrears Should be Disclosed to Obligors, Just as it is to Consumers

The disclosure of the interest rate on arrears should be patterned after the credit card industry’s requirement to disclose interest and fees that will accrue. With the passing of the Fair Credit and Charge Card Disclosure Act of 1988, the credit card industry adopted the “Schumer Box,” which provides consumers with clear and conspicuous information on fees, penalties, and interest in a tabular format. The purpose of the Act was to “assure a meaningful disclosure of credit terms so that the consumer will be able to compare more readily the various credit terms available to him and avoid the uninformed use of credit, and to protect the consumer against inaccurate and unfair credit billing and credit card practices.” Consumers are now better educated on the impact of delinquent payments, although there is some doubt that the Schumer Box has had an impact on consumer awareness.

138 Id.
140 Id.
Obligors, like consumers, should have easier access to information, especially information, such as interest on arrears, which would be submitted to a credit reporting agency. Currently, there is no requirement that Florida communicates how interest on arrears would impact an obligor. At best, the state will provide an obligor a statement of the total amount owed, including interest, after the obligor pays the clerk of the court twenty-five dollars.\(^{146}\) However, an obligor should not be required to pay a fee to find out the amount of interest he or she owes, but rather the state should periodically and routinely disclose the amount of interest that has accrued.

The disclosure of the amount of accrued interest has been discussed broadly in the business law context of debt collectors’ responsibilities.\(^{147}\) In the debate about how much information debt collectors have to disclose, the courts have varied in their conclusions.\(^{148}\) Some courts have proposed “safe harbor language” to use in communications to debtors.\(^{149}\) Perhaps the language that would provide the most information to obligors was suggested by a Connecticut judge.\(^{150}\) The judge opined that a valid notice to obligors would say: “As of today, [date], you owe $_____. This amount consists of a principal of $_____, accrued interest of $_____, and fees of $_____. This balance will continue to accrue interest after [date] at a rate of $_____ per [day/week/month/year].”\(^{151}\) This type of language would be quite helpful to Florida when it acts as a debt collector pursuing payments from obligors or debtors. It deserves serious consideration.

V. FLORIDA SHOULD ADOPT LEGISLATION ON NOTIFICATION OF ARREARS AND INTEREST RATE ON ARREARS

Obligors are offered protection under consumer laws and should be treated as consumers. The full disclosure of interest rate on arrears and the timely notification of the interest on arrears could

lead to more efficient arrears management. Florida lawmakers should adopt legislation that would provide for timely, periodic notification of arrears and the interest rate on arrears.152

Currently, there is no Florida law requiring detailed notice of interest or the amount of arrears owed.153 In 1990, the Florida Supreme Court upheld the constitutionality of the statute that enables a judgment to be issued against an obligor before the obligor has an opportunity to address the court, but advised that the statute “should be interpreted to allow for a hearing prior to the entry of a ‘final judgment by operation of law,’ provided that the obligor timely files a response.”154 However, the statute has since been modified significantly to specify notification procedures to the obligor and points of entry for the obligor.155 Still, the statute makes no mention of regularly informing obligors of past due amounts, the interest on arrears, and the potential impact of that interest on arrears.156

Until 1994, California courts had said the state’s failure to notify an obligor that she owed interest on unpaid child support is a matter of law, not a violation of due process.157 Another California court had ruled that there is no due process requirement to notify the obligor that arrears had accrued interest.158 Despite these rulings, and soon after both those cases, California implemented a law that requires notification of interest accrual in three different ways: on the money judgment, judicial council forms, and any statement of account that is sent from the local child support agency.159

157 *In re* Marriage of Thompson, 48 Cal. Rptr. 2d 882 (Cal. App. 5th Dist. 1996) (“Under the applicable statutes, there was no denial of due process if respondent was not advised he owed interest on the unpaid child support. Interest accrues as a matter of law, and parents are charged with knowledge of the law.”).
158 County of Los Angeles v. Salas, 45 Cal. Rptr. 2d 61, 63 (Cal. App. 2d Dist. 1995) (overturning a lower court’s ruling that excused interest on child support arrears because lack of notification equated to a due process violation). The court stated: “We have found no authority that supports the trial court’s determination that in a postjudgment demand for child support arrearages, due process required the district attorney give Ms. Salas written notice that the arrearages had accrued interest.” *Id.*
159 The court added this notation in the case:
We note that since the trial court rendered its decision in this case on February 14, 1994, the Legislature added section 695.211 to the Code of
Even though the Florida judiciary maintains that there is no due process requirement to notify obligors of the amount of interest on arrears, the state legislature should modify the laws to advance the concept of due process and expand consumer protection by requiring notice, disclosure, and transparency. The principle of notification is an essential element of consumer protection, and Florida should implement the notice requirement and consider the following options:

1. Statutory language that requires quarterly, annual, or periodic notice of the interest penalty, and
2. Expanded use of an existing rule that requires courts to include such a notification to obligors.

The authors propose legislation, best used for directional purposes, that Florida lawmakers could incorporate to amend Florida Statute § 61.14:

1. Title: Interest accrual on arrearages; notice statement of account; required contents

2. Every money judgment or order for child support shall provide notice that interest on arrearages accrues at the rate set by the state’s Chief Financial Officer under Fla. Stat. § 55.03 and shall include the quarterly interest rates used in the prior four quarters and the most recent annual interest rate.

3. Every money judgment or order for child support shall provide a clear and conspicuous explanation of how the state’s Chief Financial Officer determines rates.

4. The notice provisions required by this section shall be incorporated into all appropriate judicial forms.

Code of Civil Procedure section 695.211 provides: 

(a) Every money judgment or order for child support shall provide notice that interest on arrearages accrues at the legal rate.

(b) The notice provisions required by this section shall be incorporated in the appropriate Judicial Council forms.

(c) Upon implementation of the Statewide Automated Child Support System (SACSS) prescribed in Section 10815 of the Welfare and Institutions Code and certification of the SACSS by the United States Department of Health and Human Services, whenever a statement of account is issued by the district attorney in any child support action, the statement shall include a statement of an amount of current support, arrears, and interest due.” Thus, under Code of Civil Procedure section 695.211, a district attorney must include in any statement of account the amount of interest due on child support arrears. However, at the time this order was entered no affirmative obligation existed.

Id. at 64, n.1. “[W]henever a statement of account is issued by the local child support agency in any child support action, the statement shall include a statement of an amount of current support, arrears, and interest due.”

This would be similar to the CA. CIV. PROC. CODE ANN. § 695.211 (2016).

This would be similar to the CA. CIV. PROC. CODE ANN. § 695.211(a) (2016).

This would be similar to the CA. CIV. PROC. CODE ANN. § 695.211(b) (2016).
5. Whenever a statement of account is issued by the state or local child support agency in any child support action, the statement shall include a statement of an amount of current support due; the amount or an estimate of arrears due; the interest rate that may apply; and the amount or an estimate of the interest due.163

6. The statement also shall include a projection of the amount owed if the arrears are not paid for one year. The projection shall make reasonable assumptions, including as to the failure to pay the current arrears for the next twelve months, the estimate of interest for that period, and the resulting estimate of arrears due.

VI. CONCLUSION

Parent-obligors who are delinquent in child support payments are entitled to know how much interest is accruing on arrears. Informing obligors of the potential amount of interest would advance the broad concept of constitutional due process rights and expand the principle of notice that underlies consumer protection. In addition, Florida could improve the efficacy of its arrears management program by better communicating the arrears, including the interest and its impact on arrears.

163 This would be similar to the CA. CIV. PROC. CODE ANN. § 695.211(c) (2016).
