“No Man Is Above the Law and No Man Is Below It:” How Qualified Immunity Reform Could Create Accountability and Curb Widespread Police Misconduct

Lindsey de Stefan*

I. Introduction

In recent months, it has been impossible to ignore the overwhelming presence of police violence in the media.¹ Hardly a month has gone by without headlines asserting use of excessive force, brutality, or other misconduct in some corner of the United States.² It seems that no region of the nation has been unaffected by the violence, with civilian deaths at the hands of law enforcement cropping up from San Francisco³ to New York City⁴ to South Carolina,⁵ and almost everywhere in between. And with public confidence in law enforcement at a twenty-two year

* J.D. Candidate, 2017, Seton Hall University School of Law; B.A., Ramapo College of New Jersey. Special thanks to Professor Alice Ristorph and Katheryn Pereyra-Caldwell for their support and guidance throughout the writing process.

¹ Commentary and criticism about American police has spanned various forms of media and traversed many genres. See, e.g., *The Daily Show with Jon Stewart* (Comedy Central television broadcast Dec. 3, 2014) (discussing the grand jury's decision not to indict the officer who killed Eric Gardner, explaining: "I think what is so utterly depressing is that none of the ambiguities that existed in the Ferguson case exist in the Staten Island Case, and yet the outcome is exactly the same: No crime, no trial. All harm, no foul.").

² See, e.g., *Unarmed Black Mo. Teen Shot After Altercation, Police Say*, CBS NEWS (Aug. 10, 2014, 1:30 PM), <http://www.cbsnews.com/news/michael-brown-shooting-unarmed-black-missouri-teen-shot-after-altercation-police-say/>; Josh Sanburn, *Behind the Video of Eric Garner's Deadly Confrontation with New York Police*, TIME (July 23, 2014), <http://time.com/3016326/eric-garner-video-police-chokehold-death/>.

³ See Timothy Williams, *San Francisco Police Officers to Be Dismissed over Racist Texts*, N.Y. TIMES (Apr. 3, 2015), http://www.nytimes.com/2015/04/04/us/san-francisco-police-officers-to-be-dismissed-over-racist-texts.html?_r=0.

⁵ Michael S. Schmidt & Matt Apuzzo, *South Carolina Officer is Charged with the Murder of Walter Scott*, N.Y. TIMES (Apr. 7, 2015), http://www.nytimes.com/2015/04/08/us/south-carolina-officer-is-charged-with-murder-in-black-mans-death.html?_r=0.

low—with only 52 percent of U.S. citizens asserting that they have considerable confidence in law enforcement⁶—the nation has clearly taken notice.⁷

Naturally, these violent incidents raise important questions for many Americans, regardless of locale or the type of community in which they reside. Why is this happening? And how can we stop it? Unsurprisingly, extensive media commentary has ultimately invited a myriad of proposed answers to these inquiries and has even generated some potential solutions. Some point to a lack of education and opine that officers need more comprehensive training to teach them how to "defuse the sorts of deadly racially charged confrontations" that have recently been highlighted in numerous communities throughout the country.⁸ Others suggest that allowing citizens to record police would create officer accountability, serve as a disciplinary basis for abusive behavior, encourage the use of justified policing tactics, and generally deter misconduct.⁹ Others still suggest that police culture is to blame since rookies shape their attitudes about the use of force based on the words and actions of fellow officers,¹⁰ and because the warrior mentality of policing fosters an "us" versus "them" relationship between law enforcement and citizens.¹¹ In fact, a few

experts have even suggested that there has not been a wave of police violence, but that mainstream media is merely covering brutality more frequently and comprehensively.¹²

Irrespective of whether there has been an increase in the incidence of brutality or whether the nation is merely recognizing what has been an ongoing reality for many U.S. citizens, the existence of a problem is now inescapably obvious. The solution, however, is decidedly less clear. Perhaps none of the aforementioned proposals are the right answer. Alternatively, and more likely, maybe they are *all* the answer—at least partially and in combination with a number of other considerations. It is improbable that a single factor can be deemed the sole cause of widespread police misconduct. Of course, an elaborate problem with multiple dimensions will require an equally multifaceted solution. In fact, any adequate resolution will likely require the cooperation of many individuals and entities across various disciplines and industries.¹³ But no matter how winding, every path to change must begin with a single step. And the most logical place to begin is by reforming the stringent protection from civil liability enjoyed by law enforcement officers alleged to have violated individual constitutional rights.

This Comment will explore how judicial amendment of the qualified immunity doctrine—specifically as it is applied to law enforcement officers—could serve as a catalyst to begin to rein in police misconduct. Part II will describe the general history of the most significant statutory provision in this context, Section 1983, and the expansion of constitutional torts that occurred in the mid-twentieth century. Part III focuses on the judicial development of qualified immunity in the Supreme Court and explains the status of the doctrine today. Part IV discusses some of the

¹² See Elliott C. McLaughlin, *We're Not Seeing More Police Shootings, Just More News Coverage*, CNN (Apr. 21, 2015, 7:26 AM), <http://www.cnn.com/2015/04/20/us/police-brutality-video-social-media-attitudes/> (discussing the lack of accurate statistics regarding police killing civilians in the line of duty or police use of excessive force).

¹³ For example, implementing more comprehensive training would take the combined efforts of experts in police brutality to design such training, as well as the cooperation of police forces nationwide. Statutes protecting those who audiotape police would require the actions of Congress or State legislatures—or both. And a change in police culture would necessitate the active participation of police unions and local law enforcement nationwide.

most significant practical problems with the modern qualified immunity jurisprudence and its application. Part V goes on to analyze the recent spotlight on police use of force. Finally, Part VI proposes that judicial amendment of qualified immunity application will serve as an effective first step in decreasing the overall incidence of police misconduct in the United States.

II. The Court's Expansion of Remedies for Violations of Constitutional Rights

In order to appreciate the qualified immunity doctrine and its modern implications, one must first journey briefly down the historical path that preceded its inception. That path begins with Section 1983 of Title 42 of the United States Code, which provides:

Every person who, under color of any statute, ordinance, regulation, custom, or usage, of any State or Territory or the District of Columbia, subjects, or causes to be subjected, any citizen of the United States or other person within the jurisdiction thereof to the deprivation of any rights, privileges, or immunities secured by the Constitution and laws, shall be liable to the party injured in an action at law, suit in equity, or other proper proceeding for redress, except that in any action brought against a judicial officer for an act or omission taken in such officer's judicial capacity, injunctive relief shall not be granted unless a declaratory decree was violated or declaratory relief was unavailable.¹⁴

Although the statute now finds its home in the United States Code, it was originally enacted as part of the Civil Rights Act of 1871 and was colloquially referred to as the "Ku Klux Klan Act" at that time.¹⁵ In the post-Civil War Reconstruction years, radical Republican Congressmen were becoming ever more worried that murders, whippings, and other (mostly) Klan-perpetrated brutality in some southern states were preventing newly-freed slaves from voting.¹⁶ These fears

were affirmed when the 1870 elections brought a wave of violence.¹⁷ After most affected State governments failed both to punish the perpetrators of those atrocities and to protect the victims, Congress intervened by passing the Civil Rights Act of 1871, which included what we now know as § 1983.¹⁸ In the subsequent ninety years, § 1983 was largely inconsequential;¹⁹ but in 1961, when the United States Supreme Court handed down its decision in *Monroe v. Pape*, the statute began a rapid ascent to a position of significance in constitutional and civil rights jurisprudence.²⁰

In *Monroe*, the Court held that § 1983 provided a remedy to individuals “deprived of constitutional rights, privileges, and immunities” as a result of a government official’s abuse of his position.²¹ In reaching this conclusion, the Court relied on its earlier statutory construction of the phrase “under color of” as including acts of an official that are in violation of state law.²² The Court also reviewed the legislative history of the original Civil Rights Act in considerable detail and determined that one of Congress’s primary purposes was to provide a federal remedy for infringements of constitutional rights in circumstances in which a state remedy was theoretically, but not practically, available.²³ In so concluding, the Court vastly expanded the understanding of—and, thus, the potential application of—§ 1983 as a tool in civil rights litigation.²⁴ Indeed,

WASH. L. REV. 273, 279 (2014) (explaining that between 1871 and 1961, only twenty-one cases were brought under § 1983 in federal courts—only nine of which made it to the Supreme Court).

²⁰ See Forsythe, *supra* note 15.

²¹ 365 U.S. at 172.

²² See *Williams v. United States*, 341 U.S. 97, 99 (1951); *Screws v. United States*, 325 U.S. 91, 111 (1944) (“It is clear that under ‘color’ of law means under ‘pretense’ of law.”); *United States v. Classic*, 313 U.S. 299, 326 (1941) (“Misuse of power, possessed by virtue of state law and made possible only because the wrongdoer is clothed with the authority of state law, is action taken ‘under color of’ state law.”).

²³ *Monroe*, 365 U.S. at 174–75 (describing the “lawless conditions” of the South and the failure of those states to provide any “effective redress”).

²⁴ See Harry A. Blackmun, *Section 1983 and Federal Protection of Individual Rights—Will the Statute Remain Alive or Fade Away?*, 60 N.Y.U. L. REV. 1, 19 (1985) (explaining that in the twenty-two years before *Monroe*, the number of § 1983 claims to reach the Court “can almost be counted on one hand”); David Rudovsky, *The Qualified Immunity Doctrine in the Supreme Court: Judicial Activism and the Restriction of Constitutional Rights*, 138 U. PA. L. REV. 23,

after *Monroe*, the number of cases brought under the statute skyrocketed,²⁵ and § 1983 has since become the so-called “statute of choice” under which to bring constitutional tort lawsuits against government officials.²⁶ But *Monroe* was not the Court’s last word on available redress for constitutional violations—rather, it was just the beginning of a long and tumultuous relationship.

A decade later, the Court created a new cause of action that is, in effect, the federal analog of a § 1983 claim—the *Bivens* action.²⁷ In *Bivens v. Six Unknown Named Agents of Federal Bureau of Narcotics*, the Court concluded that there is a private right of action for violations of federal rights perpetrated by federal (rather than state) officials.²⁸ While *Bivens* did not directly implicate § 1983 or litigation thereunder,²⁹ *Bivens* did further expand the availability of private remedies for constitutional torts. Then, seventeen years after *Monroe*, the Court expanded the ambit of § 1983 even further.³⁰ After undertaking a second (and equally exhaustive) review of the legislative history of the Civil Rights Act of 1871 in *Monell v. Department of Social Services*, the Court overruled a portion of its *Monroe* holding by concluding that municipal bodies could be subject to liability under § 1983.³¹ However, the Court provided a substantial shield to municipal

28 (1989) (opining that “the Court freed the [Civil Rights] Act from a narrow and unjustified construction”); Michael Wells, *The Past and the Future of Constitutional Torts: From Statutory Interpretation to Common Law Rules*, 19 CONN. L. REV. 53, 53 (1986) (asserting that “the Supreme Court revived a long-neglected, ninety-year-old statute . . . making it a broad cause of action to remedy constitutional violations”); Eric H. Zagrans, “*Under Color of*” *What Law: A Reconstructed Model of Section 1983 Liability*, 71 VA. L. REV. 499, 500–01 (1985) (averring that the Court “breathed new life into the moribund [Civil Rights Act]”); *id.* at 500 n.2 (explaining that between 1871 and 1920, federal courts decided only twenty-one actions brought § 1983—only nine of which reached the Supreme Court).

²⁸ 403 U.S. 390, 392 (1971).

²⁹ See Kirby, *supra* note 27, at 466–67 (explaining that § 1983 does not provide a private right of action for violations of constitutional rights by federal officials).

³⁰ See *Monell v. Dep’t of Soc. Servs.*, 436 U.S. 658, 663 (1978).

³¹ See *id.* at 690.

bodies by holding that a municipality could incur civil liability only when it was *itself* the cause of the constitutional violation alleged, rather than imposing liability vicariously based solely on its employment of the tortfeasor.³² Put differently, the *Monell* Court concluded that a municipal body may be subject to liability when “the action that is alleged to be unconstitutional implements or executes a policy statement, ordinance, regulation, or decision officially adopted and promulgated by that body's officers.”³³ But the Court left the door for any further municipal exemptions from liability wide open: “[W]e express no views on the scope of any municipal immunity beyond holding that municipal bodies sued under § 1983 cannot be entitled to an absolute immunity, lest our decision that such bodies are subject to suit under § 1983 ‘be drained of meaning.’”³⁴

Noticeably, none of these early cases directly grappled with the qualified immunity doctrine,³⁵ and one might naturally wonder how they amount to significant steps on the path to its conception. Indeed, the aggregate effect of these decisions appears to be a pivotal expansion in the development of constitutional rights by allowing individuals greater opportunity to seek redress when government officials violate their constitutional or statutory rights. However, in the wake of these cases, the Court began to face the practical considerations of increased liability for government officials: its disallowance of vicarious municipal liability meant that, in most cases, the only potential defendant—and thus the only party who might shoulder the burden of damages to the plaintiff—would be the official who had inflicted the constitutional injury.³⁶

³² *Id.* at 692–94 (emphasis added) (“[I]t is when execution of a government’s policy or custom, whether made by its lawmakers or by those whose edicts or acts may fairly be said to represent official policy, inflicts the injury that the government as an entity is responsible under § 1983.”).

³³ *Id.* at 692.

³⁴ *Id.* at 701.

³⁵ Save, of course, for *Monell*’s express declination to decide questions of immunity.

³⁶ See Kirby, *supra* note 27, at 467 & n.42.

III. The Development of Qualified Immunity

The qualified immunity doctrine has diverged substantially from the general course toward expanding constitutional rights that *Monroe* and its progeny began to pave in the 1960s and 1970s. It has instead veered off down a long and winding byway that continues until this day. In fact, it would sometimes seem that the two paths now travel in opposite directions altogether. Notably, the statutory text of § 1983 does not explicitly or impliedly provide for any immunities;³⁷ but as the Court gradually increased liability for public officials who had violated constitutional rights, it correspondingly started to extend the immunities that had traditionally been available at common law.³⁸ Interestingly, the Court conceded that the statute's text is broader than the common law of torts was in 1871 because it "purports to create a damages remedy against every state official for the violation of any person's federal constitutional or statutory rights."³⁹ In order to deal with the lack of legal and historical context to fit the field of constitutional torts, the Court has come to rely on loosely related common law causes of action and their corresponding immunities⁴⁰ in an attempt to tailor them to the structure of modern government.⁴¹ In so doing, the Court has gradually, but consistently, expanded the scope of immunities available, both in terms of which officials are entitled to such immunity⁴² and in regard to the types of situations in which immunity is

³⁷ See *supra* text accompanying note 14.

³⁸ See *Kalina v. Fletcher*, 522 U.S. 118, 123 (1997) ("We have [] recognized that Congress intended [§ 1983] to be construed in light of common law principles that were well settled at the time of its enactment."); *Pierson v. Ray*, 386 U.S. 547, 557 (1967) (expanding the common law defense of good faith and probable cause that was available for false arrest and imprisonment to actions brought under § 1983).

³⁹ *Kalina*, 522 U.S. at 123.

⁴⁰ See *Kirby*, *supra* note 27, at 468 (discussing the Court's extension of absolute immunity to constitutional tort claims based on concerns about public policy and "a combination of loosely analogous common law immunities"); *Rudovsky*, *supra* note 24, at 36 (explaining that a threshold question of the qualified immunity analysis is "whether and to what degree qualified immunity would have been a defense in common law analogues to constitutional tort claims").

⁴¹ See Jack M. Beermann, *Qualified Immunity and Constitutional Avoidance*, 2009 SUP. CT. REV. 139, 145 (2009) (noting the Court-created doctrine used to adapt the scope of immunities at common law to contemporary government structure).

⁴² See, e.g., *Harlow v. Fitzgerald*, 457 U.S. 800, 807–13 (1982) (qualified immunity for high-level Presidential aides); *Wood v. Strickland*, 420 U.S. 308, 319 (1975) (qualified immunity for school officials); *Scheuer v. Rhodes*, 416 U.S. 232, 237–38 (1974) (qualified immunity for Governor of Ohio).

available.⁴³ The Court has arguably enlarged the immunities available to the officials perpetrating constitutional violations more than it expanded the remedies for those whose rights were violated in the first instance.

Interestingly, the Court began sketching the contours of official immunity under § 1983 a decade before it broadened the applicability of that statute in *Monroe*, concluding “that § 1983 [was] to be read in harmony with general principles of tort immunities and defenses rather than in derogation of them.”⁴⁴ Accordingly, in *Tenney v. Bradhove* the Court noted a legacy of legislative freedom dating back to sixteenth century England and held that legislators were entitled to absolute immunity from civil liability when acting within the legislative capacity.⁴⁵ The Court later reinforced a similarly longstanding tradition of absolute judicial immunity⁴⁶ and the well-settled common law rule of absolute immunity for prosecutors.⁴⁷

Even before its admittedly limited imposition of municipal liability in *Monell*, the Court had already begun to rein in the breadth of the newly-expanded § 1983 remedy.⁴⁸ In *Pierson v. Ray*, the Court faced the issue of what immunity, if any, was available to police officers who arrested a group of clergymen for violating a Mississippi law when, several years after the arrest,

⁴³ See generally *City & Cnty. of San Francisco v. Sheehan*, 135 S. Ct. 1765, 1774–78 (2015) (reversing Court of Appeals and granting qualified immunity to officers who forcibly entered the room of a mentally disabled woman and shot her multiple times); *Carroll v. Carman*, 135 S. Ct. 348, 349–50 (2014) (per curiam) (reversing Court of Appeals and granting qualified immunity to officer who went into a private backyard and onto the deck without a warrant); *Plumhoff v. Rickard*, 134 S. Ct. 2012, 2020–24 (2014) (reversing District Court and Court of Appeals and granting qualified immunity to officers who fired fifteen shots to end a high-speed car chase and killed the driver and passenger); *Scott v. Harris*, 550 U.S. 372, 374–86 (2007) (reversing District Court and Court of Appeals and granting qualified immunity to officer who ended a car chase by running the driver off the road and rendering him a quadriplegic).

⁴⁴ *Imbler v. Pachtman*, 424 U.S. 409, 418 (1976) (summarizing the holding of *Tenney v. Brandhove*, 341 U.S. 367, 367 (1951)).

⁴⁵ See *Tenney*, 341 U.S. at 376–79 (expressing disbelief at the notion “that Congress—itsself a staunch advocate of legislative freedom—would impinge on a tradition so well grounded in history and reason by covert inclusion in the general language [of § 1983]”).

⁴⁶ See *Pierson*, 386 U.S. at 553–55 (comparing legislative and judicial immunity at common law, explaining that “[t]he immunity of judges for acts within the judicial role is equally well established, and we presume that Congress would have specifically so provided had it wished to abolish the doctrine”).

⁴⁷ See *Imbler*, 424 U.S. at 421–27.

⁴⁸ See *Pierson*, 386 U.S. at 555–57.

the law was held unconstitutional as applied to circumstances similar to those at issue.⁴⁹ In holding that officers were immune from civil liability if they acted in good faith and with probable cause, the Court placed a particular emphasis on fairness, reasoning that a police officer should not have to “choose between being charged with dereliction of duty if he does not arrest when he has probable cause, and being mulcted in damages if he does.”⁵⁰ In recognizing that public officials not otherwise entitled to absolute immunity⁵¹ also require some margin for error,⁵² *Pierson*’s “good faith and probable cause” guideline⁵³ was the birth of an immunity doctrine that would continue to plague the Supreme Court,⁵⁴ to baffle lower federal courts,⁵⁵ and to consume considerable judicial resources⁵⁶ in the ensuing decades.

Seven years later, the Court undertook its first qualified immunity analysis after its initial introduction in *Pierson*.⁵⁷ In *Scheuer v. Rhodes*, the Court clarified the application of the doctrine, explaining that there were two criteria that must be met for an official to be eligible for immunity:

⁴⁹ *Id.* at 549–50.

⁵⁰ *See id.* at 555–57.

⁵¹ *See id.* at 555 (noting that “[t]he common law has never granted police officers an absolute and unqualified immunity”).

⁵² *See Scheuer*, 416 U.S. at 242 (“Implicit in the idea that officials have some immunity—absolute or qualified—for their acts, is a recognition that they may err.”).

⁵³ *Id.* at 245.

⁵⁴ *See generally* *Pearson v. Callahan*, 555 U.S. 223, 223 (2009); *Saucier v. Katz*, 533 U.S. 194, 194 (2001); *Harlow*, 457 U.S. at 800.

⁵⁵ *See, e.g.,* *Curley v. Klem*, 499 F.3d 199, 208–09 (3d Cir. 2007) (noting the Circuit split regarding whether judges or juries should decide if qualified immunity applies); *Harbert Int’l v. James*, 157 F.3d 1271, 1285–86 (1998) (disagreeing with the Fifth and Ninth Circuits’ interpretations of *Davis v. Scherer*, 468 U.S. 183 (1984)); *DiMeglio v. Haines*, 45 F.3d 790, 795–97 (4th Cir. 1995) (surveying the interpretations of eight different Courts of Appeal to *Siebert v. Gilley*, 500 U.S. 226 (1991) and asserting disagreement with all of those constructions of the Court’s holding).

⁵⁶ *See* Alan K. Chen, *The Burdens of Qualified Immunity: Summary Judgment and the Role of Facts in Constitutional Tort Law*, 47 AM. U. L. REV. 1, 2 (1997) (noting that federal courts have used increasingly more resources to adjudicating immunity claims in recent years); Charles T. Putnam & Charles T. Ferris, *Defending a Maligned Defense: The Policy Bases of the Qualified Immunity Defense in Actions Under 42 U.S.C. § 1983*, 12 BRIDGEPORT L. REV. 665, 670 (1992) (describing the scarcity of judicial resources but the ever-increasing number of § 1983 cases filed in “overburdened federal courts”). *See also* Table C-3: U.S. District Courts—Civil Cases Commenced, by Nature of Suit and District, During the 12-Month Period Ending March 31, 2015, U.S. COURTS, <http://www.uscourts.gov/statistics/table/c-3/federal-judicial-caseload-statistics/2015/03/31> (follow “Download Data Table” hyperlink) (Excluding prisoner petitions, 36,841 of the 281,608 civil cases (approximately 13 percent) filed in District Courts from April 1, 2014, to March 31, 2015, were described as “Civil Rights” cases.).

⁵⁷ *See Scheuer*, 416 U.S. at 232.

(1) he must have had reasonable grounds for the belief formed in light of all circumstances at the time; and (2) he must have had a good faith belief that the action was lawful.⁵⁸ Put another way, the Court engaged in a two-pronged analysis that assessed the official’s allegedly unconstitutional act under both objective and subjective standards.⁵⁹ The Court further elucidated this two-part test shortly thereafter, explaining that entitlement to immunity requires that an official act with a sincere belief that he is doing right, and he must not have violated a well-settled constitutional right—even if the violation resulted from ignorance or indifference.⁶⁰

These early cases justified qualified immunity on two primary bases, both of which were rooted in the rationales of traditional common law: fairness and overdeterrence.⁶¹ The Court explained that public officials, from police officers to governors, “who fail to make decisions when they are needed or who do not act to implement decisions when they are made do not fully and faithfully perform the duties of their offices.”⁶² The Court further expounded that the immunity doctrine recognizes that officials will sometimes make mistakes and, accordingly, gives them room to err in the performance of their duties based on the assumption “it is better to risk some error and possible injury from such error than [for an official] not to decide or act at all.”⁶³ The Court’s justification demonstrates its concern that officials would fail to make important decisions or take necessary actions for fear of incurring civil liability, and that the public good would ultimately

⁵⁸ *See id.* at 247–48.

⁵⁹ *See Kirby, supra* note 27, at 473.

⁶⁰ *Wood v. Strickland*, 420 U.S. 308, 321–22 (1975).

⁶¹ *See Scheuer*, 416 U.S. at 240 (explaining that official immunity at common law was based on “two mutually dependent rationales: (1) the injustice . . . of subjecting to liability an officer who is required, by . . . his position, to exercise discretion; (2) the danger that the threat of such liability would deter his willingness to execute his office with the decisiveness and the judgment required by the public good”); *Chen, supra* note 56, at 15 (noting that qualified immunity jurisprudence in the Supreme Court “began with a focus on fairness and overdeterrence rationales”).

⁶² *Scheuer*, 416 U.S. at 241–42.

⁶³ *Id.* at 242.

suffer.⁶⁴ In essence, qualified immunity avoids “placing police officers between the proverbial rock and a hard place” when tension arises between the officer’s law enforcement responsibilities and his constitutional obligations.⁶⁵

But a mere seven years after deciding *Wood v. Strickland*, the Court significantly altered its qualified immunity jurisprudence when it wholly abandoned the two-part objective-subjective test in favor of a purely objective analysis: Officials would be entitled to immunity so long as they did not violate clearly established constitutional or statutory rights of which a reasonable person would have known.⁶⁶ The Court’s adjusted analysis seems to mirror a shift in its predominant policy concerns.⁶⁷ The Court became less concerned with unfairness and overdetering officials, and more concerned with the substantial social burdens at stake in unrestricted litigation of claims against government officials, such as financing the official’s defense, diverting official efforts from important public matters, and dissuading capable individuals from seeking public office.⁶⁸ The Court reasoned that inquiring into the official’s subjective state was incompatible⁶⁹ with the effective balancing of important social costs and the individual’s right to sue an official for violations of his constitutional liberties, requiring the elimination of the subjective “good faith” prong of the qualified immunity test.⁷⁰

⁶⁴ See *Wood*, 420 U.S. at 319–20 (“The imposition of monetary costs for mistakes which were not unreasonable in the light of all the circumstances would undoubtedly deter even the most conscientious school decisionmaker from exercising his judgment independently, forcefully, and in a manner best serving the long term interest . . .”).

⁶⁵ *Chen*, *supra* note 56, at 16.

⁶⁶ *Harlow v. Fitzgerald*, 457 U.S. 800, 818 (1982).

⁶⁷ *Chen*, *supra* note 56, at 17–18 (“While fairness and overdeterrence still play a formal role in the Court’s immunity jurisprudence, their function as the driving force behind qualified immunity was severely diminished after *Harlow*.”).

⁶⁸ *Harlow*, 457 U.S. at 814.

⁶⁹ See *id.* at 815–18 (explaining why a subjective intent can so rarely be decided on summary judgment and discussing the disruptive effects to government that broad-ranging discovery to uncover subjective states of mind can have).

⁷⁰ See *id.* at 814–15 (“[T]he dismissal of insubstantial lawsuits without trial—a factor presupposed in the balance of competing interests struck by our prior cases—requires an adjustment of the ‘good faith’ standard established by our decisions.”).

Though it has been tweaked somewhat along the way, *Harlow v. Fitzgerald* represents the modern test for qualified immunity. The current standard for qualified immunity involves two different questions, both of which must be answered affirmatively in order for a plaintiff's suit to proceed against an official: (1) Did the defendant violate the plaintiff's constitutional right? (2) Was a constitutional right clearly established at the time of the violation?⁷¹ In its most recent formulation, these questions do not need to be answered sequentially,⁷² and the Court has left the order of inquiry to the discretion of the district courts.⁷³

IV. The Problems with Qualified Immunity

The legal academic community has criticized the qualified immunity doctrine on a number of grounds since at least the 1980s.⁷⁴ Despite these criticisms, in recent years—and particularly since the beginning of the Roberts era—the Court has made it ever-more difficult to impose liability on law enforcement officers alleged to have acted unconstitutionally.⁷⁵ This extension of the doctrine has occurred gradually through decisions that might initially seem unrelated, but which have nevertheless resulted in one overarching thematic problem: a lack of accountability.

A. The Surprising Lack of Clarity of the “Clearly Established” Right

One problem with qualified immunity results from the so-called two-pronged inquiry. In 2001, concerned that disposing of cases based solely on the “clearly established” prong would

⁷¹ *Pearson*, 555 U.S. at 232.

⁷² The Court does, however, state that it is “often beneficial” to answer the two questions in the above specified order. *Id.* at 236.

⁷³ *See id.* at 236–43.

⁷⁴ *See, e.g.*, Alan K. Chen, *The Facts About Qualified Immunity*, 55 EMORY L.J. 229, 233 (2006) (condemning the “lack of transparency” in the Court’s manipulation of the qualified immunity doctrine and its disregard of the critical role that facts play in the qualified immunity analysis); Rudovsky, *supra* note 24, at 27 (criticizing the limitations on constitutional torts that the Court’s qualified immunity doctrine has imposed and the potential danger that qualified immunity will redefine substantive constitutional law).

⁷⁵ *See* Edwin Chemerinsky, *Closing the Courthouse Doors*, 41 HUM. RTS. 5, 5 (2014).

“stunt the development” of constitutional law, the Court mandated that lower courts first decide whether there was a constitutional violation before determining whether the right was clearly established.⁷⁶ The decision in *Saucier v. Katz* was, to say the least, unpopular,⁷⁷ and in 2009, the Court unanimously overruled the decision and once again left the procedural sequence to the discretion of lower courts.⁷⁸ But because courts are no longer required to address the two-part inquiry in any particular order, the practical effect has been precisely what the Court feared in its *Saucier* decision: frequent disposal of cases based on the perceived lack of a “clearly established” right without ever addressing the merits of the constitutional claim.⁷⁹

A recent survey of circuit court cases decided since *Pearson v. Callahan* in 2009 demonstrates the frequency with which lower courts are disposing of cases based on a lack of a clearly established law.⁸⁰ The study, which analyzed 844 published and unpublished Courts of Appeal opinions decided between 2009 and 2012, encompassing 1,460 total claims, found that qualified immunity was granted in 1,055 of the claims, or approximately 72 percent of the time.⁸¹ In 534 (or nearly 51 percent) of the claims in which the court granted immunity, the court concluded that the right asserted was not clearly established.⁸² So in more than half of the claims in which immunity was granted, the basis for the court’s holding was the absence of clearly established law.

⁷⁶ See *Saucier v. Katz*, 533 U.S. 194, 201 (2001).

⁷⁷ *Pearson*, 555 U.S. at 234–35 (noting that lower court judges “have not been reticent in their criticism,” that application of the *Saucier* rule “has not always been enthusiastic,” and that even some members of the Court were critical).

⁷⁸ *Id.* at 236.

⁸¹ *Id.*

⁸² See *id.* at 31–32.

But perhaps somewhat ironically, the concept of a “clearly” established right is in and of itself less than clear, and a great deal of confusion exists over what rights fall within this vague classification.⁸³ In essence, approximately 50 percent of the time, a court’s decision to grant immunity to an official is based on a muddled and uncertain legal precept. In order to qualify as clearly established, “a right must be sufficiently clear that every reasonable official would have understood that what he is doing violates that right.”⁸⁴ There are few unambiguous bright-line rules in modern constitutional jurisprudence, and most doctrines are instead articulated as relatively vague standards or balancing tests.⁸⁵ In addition, because there are considerable distinctions in terms of the structure, aim, and available alternative remedies of various constitutional rights, the general-purpose nature of qualified immunity is problematic.⁸⁶ Defining a clearly established law is straightforward when the right is laid out in a stable and fairly specific doctrine, but when the rule changes, the new law only becomes clearly established when a clarifying court decision is handed down.⁸⁷ When such constitutional rights are violated, qualified immunity allows officials to avoid liability because of a failure to anticipate developments in the law.⁸⁸ And although the Court held in 2002 that there need not be a case on point in order to find clearly established law,⁸⁹ it has nevertheless continued to grant qualified immunity in the absence of similar precedent.⁹⁰ Unsurprisingly, lower courts struggle with the question of whether a right

⁸³ See Alan K. Chen, *The Ultimate Standard: Qualified Immunity in the Age of Constitutional Balancing Tests*, 81 IOWA L. REV. 261, 329 (1995).

⁸⁷ See *id.*

⁸⁸ *Id.*

⁸⁹ Hope v. Pelzer, 536 U.S. 730, 741 (2002) (explaining that “officials can still be on notice that their conduct violates established law even in novel factual circumstances”).

⁹⁰ See Chemerinsky, *supra* note 75, at 6.

is clearly established, and the circuits have developed markedly varying approaches to the inquiry.⁹¹

Finally, year after year, despite attempts to clarify the doctrine, it seems that the Supreme Court has only further added to the confusion of lower courts. Indeed, almost without fail, Supreme Court cases since *Pearson* have apparently further expanded the qualified immunity doctrine by upholding its application in all manner of diverse situations—seemingly in every set of circumstances with which it has been presented.⁹²

B. An Overconfidence in Overdeterrence

The judicial system’s somewhat naïve faith in the power of civil suits as a deterrent has inadvertently produced another problem in qualified immunity jurisprudence.⁹³ This belief has generated concern in the Supreme Court about overdeterrence—the notion that fear of being sued “is so strong that it can ‘dampen the ardor of all but the most resolute, or the most irresponsible [public officials], in the unflinching discharge of their duties.’”⁹⁴ This trepidation about too much deterrence and its potentially chilling effect on government operations has played a powerful role in shaping Court decisions toward limiting civil remedies.⁹⁵ Of course, lawsuits are intended to have this deterrent effect—indeed, are relied upon to have such effect as part of our system of

⁹¹ See Jeffries, *supra* note 86, at 852 (“[D]etermining whether an officer violated ‘clearly established’ law has proved to be a mare’s nest of complexity and confusion.”).

⁹² See, e.g., *Taylor v. Barkes*, 135 S. Ct. 2042, 2042 (2015); *Reichle v. Howards*, 132 S. Ct. 2088, 2088 (2012); *Ashcroft v. al-Kidd*, 563 U.S. 731, 731 (2011).

⁹³ See Joanna C. Schwartz, *Myths and Mechanics of Deterrence: The Role of Lawsuits in Law Enforcement Decisionmaking*, 57 UCLA L. REV. 1023, 1024–25 (2010) (explaining that the Court believes that being sued or even the threat of being sued is enough to make officials act within the laws).

⁹⁴ *Id.* at 1025 (quoting *Wyatt v. Cole*, 504 U.S. 158, 161 (1992)).

⁹⁵ See *id.*

accountability for government officials. Unfortunately, reality suggests that the deterrent power of lawsuits is not quite as potent as the Supreme Court envisions.⁹⁶

The Court specifically fears that financial liability, in the form of paying compensatory damages to victims whose constitutional rights an officer has violated, will be a vehicle of overdeterrence.⁹⁷ But the widespread practice of indemnification means that individual officers are almost never financially responsible for civil judgments against them, practically eliminating any fiscal motivation for avoiding harmful conduct.⁹⁸ In fact, in many instances, even the police department that employs the officer suffers no direct financial consequences because police litigation costs and damages awards are often paid from a city or insurer's general budget.⁹⁹ The police department is not financially penalized, and thus has no incentive to discipline the officer or attempt to prevent him from repeating the unconstitutional behavior in the future. And because law enforcement officials are often unaware of the allegations set forth in lawsuits filed against them or their employees, officers' conduct often goes uninvestigated and undisciplined, and allegations of unconstitutional conduct do not affect performance reviews or opportunities for promotion.¹⁰⁰ Finally, although many law enforcement officers claim that the threat of incurring liability deters them from misconduct, studies contrarily indicate that potential liability does not actually alter most officers' on-the-job actions.¹⁰¹

⁹⁶ See Joanna C. Schwartz, *Police Indemnification*, 89 N.Y.U. L. REV. 885, 894 n. 41 (2014) (explaining that the Court has never given any empirical evidence to support its belief in the deterrent power of lawsuits).

¹⁰⁰ See Schwartz, *supra* note 93, at 1076–77.

¹⁰¹ *Id.* at 1077–78.

C. The Unintended Upshot of a Universally Applicable Standard

Although many of the weaknesses of qualified immunity can, for the most part, be considered unintended consequences, one significant flaw was the Court’s deliberate decision to utilize a one-size-fits-all standard. In early qualified immunity decisions, the Court acknowledged the possibility that the doctrine might apply differently depending on the type of official involved in a particular situation.¹⁰² But, as it so commonly does, the Court apparently altered its approach. For nearly four decades, the Court has applied the qualified immunity doctrine as a standard applicable to all officials who do not enjoy absolute immunity.¹⁰³ Indeed, the Court has been explicit about its unwillingness “to complicate qualified immunity analysis by making the scope or extent of immunity turn on the precise nature of various officials’ duties.”¹⁰⁴ In so doing, the Court has overextended the doctrine. It is essentially providing too much protection for lower-level officers because all officials not entitled to absolute immunity now enjoy immunity that the Court “ha[d] developed for a quite different group of high public office holders.”¹⁰⁵ This is perhaps most problematic when a plaintiff alleges Fourth Amendment violations because qualified immunity doctrine provides officers with two layers of liability protection: qualified immunity’s reasonableness standard on top of the reasonableness already embodied in Fourth Amendment substantive law.¹⁰⁶

¹⁰² See *Scheuer v. Rhodes*, 416 U.S. 232, 247 (1974) (“[I]n varying scope, a qualified immunity is available to officers of the executive branch of government, the variation being dependent upon the scope of discretion and responsibilities of the office and all the circumstances as they reasonably appeared at the time”); *Pierson v. Ray*, 386 U.S. 547, 554–55 (1967) (distinguishing judges, who are entitled to absolute immunity, and police officers, who enjoy good-faith immunity); *Chen*, *supra* note 83, at 287–89.

¹⁰³ See *Procunier v. Navarette*, 343 U.S. 555, 561–62 (1978) (explaining that officials not entitled to absolute immunity “could rely only on the qualified immunity described” in earlier cases); *Chen*, *supra* note 83, at 289.

¹⁰⁴ *Anderson v. Creighton*, 483 U.S. 635, 643 (1987).

¹⁰⁵ *Id.* at 647 (Stevens, J., dissenting).

¹⁰⁶ See *Chen*, *supra* note 83, at 296.

D. Annihilating Accountability

Of course, the most outwardly evident and alarming problem with qualified immunity jurisprudence has been its cumulative erosion of law enforcement accountability. Perhaps Erwin Chemerinsky summarized it best when he noted that “[i]n recent years, the court has made it very difficult, and often impossible, to hold police officers and the governments that employ them accountable for civil rights violations.”¹⁰⁷ Many of the aforementioned procedural and substantive problems with the qualified immunity doctrine have contributed to what might be considered a deleterious byproduct. But recent Court decisions have also demonstrated a willingness to extend immunity in even the most egregious circumstances.¹⁰⁸

For example, in *Plumhoff v. Rickard*, the Court held that three officers did not use excessive force and were entitled to qualified immunity when they had collectively fired fifteen shots at a fleeing car, causing the deaths of the driver and passenger.¹⁰⁹ The incident ensued after one of the officers stopped the vehicle for having only one working headlight and, rather than exit the vehicle as the officer instructed, the driver instead sped away, prompting the officer and several others to give chase.¹¹⁰ Overturning both the district court and the court of appeals, the Supreme Court held that the use of deadly force was permissible because the driver “posed a grave public safety risk” and that firing fifteen times was not unreasonable because “the officers need not stop shooting

¹⁰⁸ See, e.g., *City & Cnty. of San Francisco v. Sheehan*, 135 S. Ct. 1765, 1774–78 (2015); *Carroll v. Carman*, 135 S. Ct. 348, 349–50 (2014) (per curiam); *Scott v. Harris*, 550 U.S. 372, 374–86 (2007). See also Susan Bendlin, *Qualified Immunity: Protecting “All But the Plainly Incompetent” (and Maybe Some of Them, Too)*, 45 J. MARSHALL L. REV. 1023, 1023 (2012) (opining that “[p]ublic officials can be more certain than ever before that qualified immunity will shield them from suits for money damages even if their actions violate the constitutional rights of another”).

¹⁰⁹ *Plumhoff v. Rickard*, 134 S. Ct. 2012, 2017–18, 2021–24 (2014).

¹¹⁰ *Id.* at 2017.

until the threat is over.”¹¹¹ Somewhat similarly, in *Brosseau v. Haugen*, the Court held that an officer was entitled to immunity when she shot an unarmed man in the back through the window of his Jeep—which was not moving—as a means of preventing his escape.¹¹² The Court explained that the officer’s actions “fell in the ‘hazy border between excessive and acceptable force,’” but that previous Court decisions “by no means ‘clearly establish’ that Brosseau’s conduct violated the Fourth Amendment.”¹¹³

V. The Problem of Police Use of Force

The problems with both the conception and application of qualified immunity are surely many more than this Comment can begin to discuss. But those mentioned in the previous section are of particular relevance to the recent questions surrounding police misconduct. Indeed, the link between police violence and the vast confusion regarding “clearly established” rights, or of giving lower courts complete discretion to address the two-pronged test in whichever order they see fit, might not be obvious at first blush. But it is not difficult to see how qualified immunity’s gradual deterioration of law enforcement’s accountability—effected, in part, by the aforesaid difficulties—plays a role in the current predicament between the police and those they are tasked with policing.

A. The President’s Task Force on 21st Century Policing Prescribes Trust and Legitimacy

In response to the officer-perpetrated violence and the national reaction thereto, President Obama created the Task Force on 21st Century Policing in December 2014, to determine best practices for strengthening relationships between law enforcement and the public while also

¹¹¹ *Id.* at 2021–22. The Court also reasoned that the presence of a passenger in the front seat should play no part in its analysis. *Id.* at 2022.

¹¹² *Brosseau v. Haugen*, 543 U.S. 194, 195–97 (2004) (per curiam).

¹¹³ *Id.* at 201 (quoting *Saucier v. Katz*, 533 U.S. 194, 206 (2001)).

aiming to reduce crime.¹¹⁴ In its Final Report, the Task Force set forth myriad recommendations and action steps by which to implement such recommendations, all of which aim at a paramount umbrella objective: fostering trust and legitimacy between the police and the communities they serve.¹¹⁵ The Final Report is comprehensive in that it covers six general topics and recommends collaboration not only among the various levels of government,¹¹⁶ but between individual law enforcement agencies and local schools,¹¹⁷ higher-learning institutions,¹¹⁸ other local jurisdictions,¹¹⁹ and individual and corporate members of the community.¹²⁰ But the scope of the Task Force’s assignment was limited to police-community interactions, and it advocates for holistic evaluation of the criminal justice system in order to determine a plan for comprehensive criminal justice reform.¹²¹

Establishing police accountability is a palpable recurring theme of the Final Report. For example, the Task Force encourages law enforcement agencies to foster transparency and ensure accountability by making departmental policies freely available to citizens, regularly posting data about stops, summonses, arrests, crime, and the like on the department website, and promptly and candidly communicating with the community about serious incidents—including alleged officer misconduct.¹²² Additionally, the Task Force emphasizes the need for policy reform to control the use of police force and urges departments to mandate external, independent criminal investigations

for cases of officer-involved shootings, in-custody deaths, and fatal use of force in order to demonstrate transparency and rebuild trust.¹²³

B. The Police and the Policed: A Relationship in Need of Repair

Unsurprisingly, police shootings in general tend to produce tension between the police and the policed,¹²⁴ and the fact that most of the incidents propagated through various forms of media since 2014 have involved the deaths of unarmed citizens at the hands of police¹²⁵ has only made matters worse. Regardless of whether the number of police slayings has in fact increased, or whether the media is simply giving more attention to such occurrences, the general relationships between law enforcement agencies and communities nationwide are likely even further strained than in the case of more isolated, or seemingly more isolated, events.¹²⁶ In addition, multiple declinations of grand juries to indict officers involved in high-profile slayings of unarmed citizens has further exacerbated the problem, inciting outrage, inspiring protests,¹²⁷ and raising critical questions about the extent of police accountability.¹²⁸

Unfortunately, while the FBI plans to improve its system for gathering information about the use of force by law enforcement by 2017, its data collection up to this point has been less-than-stellar.¹²⁹ And although the *Washington Post* undertook a year-long investigation in 2015 in order to accurately track the number of fatal shootings by on-duty police officers,¹³⁰ the fallibility of previous federal data makes it impossible to ascertain how that total compares to prior years. Moreover, the *Post*'s report does not include other types of deaths at the hands of police, such as in-custody deaths¹³¹ or deaths resulting from Tasers.¹³² However, it is noteworthy that the *Post*'s figure of 986 lethal police shootings is more than double the FBI's average annual tally for the preceding decade.¹³³ So, if nothing else, this stark disparity reveals that such occurrences are substantially more prevalent than anyone was aware.

Of course, the *Post*'s figures are subject to varying interpretations, each of which have some merit. Some may consider the recent shootings to be an unfortunate but nonetheless routine consequence of enforcing the laws. On the other hand, nationwide protests have demonstrated that others consider civilian deaths at the hands of police officers to be an insult to constitutional rights. And surely the opinions of many Americans lie somewhere on the spectrum in between. While the statistical truth may forever remain a mystery, one thing is clear: the need for change.¹³⁴ The

(explaining that grand juries repeatedly failing to indict officers who engage in brutality and the Richmond County District Attorney's grant of immunity during the grand jury process to some of the officers involved in the death of Eric Garner "demonstrate a worrying lack of accountability or consequence for police misconduct").

¹³² Forty-nine people died as a result of officers with Tasers in 2015. *Id.*

¹³³ *Id.*

¹³⁴ The urgent necessity is demonstrated by the handful of police departments across the country, including Philadelphia, Seattle, and San Francisco, which have already begun implementing specific recommendations of the

American public has lost trust in its law enforcement, not only because of the perceived frequency of the use of lethal force, but because of subsequent investigations into such incidents, which many view as biased.¹³⁵ The nation is calling for reform,¹³⁶ and various government agencies,¹³⁷ branches of local government,¹³⁸ and even the President¹³⁹ have responded to the outcry. But although the need for change has been duly acknowledged, the question of how to implement comprehensive reform on a national scale remains unresolved.

VI. Amending Qualified Immunity Doctrine as a Catalyst for Curbing Police Violence

Altering the qualified immunity doctrine is an excellent way to begin the path to restoring trust by establishing a much-needed sense of accountability. Civil remedies are a good jumping off point because, as repeated failures to indict officers—even in the face of video footage—have demonstrated, accountability via the criminal law is a far-off possibility, if it is possible at all.

Prosecutors are generally disinclined to bring charges against law enforcement officers,¹⁴⁰ and grand juries are equally as hesitant to indict them.¹⁴¹ Independent investigations, as suggested by the Task Force, are an excellent idea, but establishing a feasible system nationwide would take time. On the other hand, Supreme Court amendment of the stringent immunity afforded to police officers could take effect relatively quickly.

Of course, this is easier said than done. The Court has increasingly enlarged the immunity afforded to police officers in its recent decisions, and any 180-degree turnaround would likely require a change in Court composition. But the current Court can nevertheless begin to firm up qualified immunity doctrine by simply providing more guidance and clarification, thereby enhancing accountability and reaffirming trust between law enforcement and their respective communities.

The concept of a clearly established right is, in many ways, a problem that requires solving. A substantial number of cases are disposed of on the premise that a right was not “clearly established”—yet lower courts have struggled for years with what those words actually mean. Arguably, then, at least some officers are escaping liability simply because of the Court’s repeated failures to establish consistency in its qualified immunity jurisprudence. But if the Court used qualified immunity opinions to demonstrate what qualifies as a clearly established right by meticulously outlining its reasoning in answering whether a set of facts implicates such a right, the Court could alleviate some confusion. In other words, rather than taking cases simply to overturn the lower courts’ denial of immunity, it could take cases to affirm those denials or, alternatively,

¹⁴⁰ See HUMAN RIGHTS WATCH, *supra* note 124, at 85. Reasons that prosecutors may opt not to pursue charges against police officers for brutality include: (1) the typically close working relationship between district attorneys and officers; (2) difficulty in convincing juries that officers committed a crime (as opposed to merely making a mistake); and (3) lack of information about prosecutable cases or systems for reviewing potentially prosecutable cases. *Id.* at 86.

¹⁴¹ See *id.* (explaining that even seemingly foolproof cases against on-duty officers can fail because of juries’ tendency to support the police and their reluctance to find officers guilty on criminal charges).

to reverse lower courts' grant of immunity. By so doing, the Court can give examples of what constitutes a right that is "sufficiently clear that every reasonable official would have understood that what he is doing violates that right,"¹⁴² and can give lower courts somewhat of a guide to follow.

By elucidating the contours of the clearly established right, the Court would alleviate some of the confusion of lower courts and ensure that they are in fact applying that part of the test properly. Proper application of this prong directly promotes accountability, as the public can rest assured that, at least in that regard, cases are not being disposed of based merely on perplexity and uncertainty. Moreover, increased confidence about the clearly established prong could foster a willingness to take on the second part of the test and, in so doing, advance the development of constitutional law and clarify further constitutional rights.

The Court could also accept that its attempts at a general standard for all classes of officials that are not otherwise entitled to absolute immunity has been problematic and hugely unsuccessful. Though the Court apparently fears "complicating" qualified immunity, the doctrine is quite complicated as is, and adopting more particularized classes of officials with different standards of immunity would not only assist lower courts in properly analyzing immunity, but would promote justice in constitutional tort litigation. For example, the Court could classify officials based on the approximate number of people with whom they come in contact, so to speak, and that might therefore bring civil suits against them. A governor, for example, could theoretically face a lawsuit from any resident of the state, and would thus be afforded more stringent protection—much like the standard afforded to all officials now. But law enforcement officers, who come in contact with only the residents of one town, city, or perhaps county, risk possible suits from a much smaller

¹⁴² Taylor v. Barkes, 135 S. Ct. 2042, 2044 (2015).

pool of people. The threat of litigation would therefore be much less crippling on governmental function, and immunity protection need not be so rigorous. In the case of allegations of Fourth Amendment violations, in light of the already-existing reasonableness standard, immunity may be inappropriate altogether.

In addition, the Court could do its proverbial homework and take notice of the widespread indemnification of officers that often results in a complete absence of financial or employment-related consequences for law enforcement. If the Court stopped relying on its own intuition, and instead came to grips with the facts, it would likely realize that it has been overzealous in protecting low-level officers, and be inclined to alter course somewhat.

By beginning to mend the qualified immunity doctrine in these ways, the Court will allow more civil suits for the vindication of constitutional rights to succeed. This will help to reduce the public mentality—strengthened by recent events—that cops get away with everything, in every regard. Civil suits avoid subjecting law enforcement to any criminal liability that, because of recent events, many laypersons believe is warranted. While this may be true in select circumstances, reality demonstrates that criminal charges are highly unlikely to stick against a police officer. But allowing more civil suits to go forward will serve as an important reminder to both civilians and law enforcement that the police are not above the law, and that they are held accountable for their wrongdoings. In turn, this accountability will begin to heal the relationship between law enforcement and communities by serving as the first step on what will surely be a long path to rebuilding the trust that is so crucial.

VII. Conclusion

By adopting different immunity standards for high-level and low-level officials, clarifying the vagueness surrounding the definition of a “clearly established” right, and acknowledging the real-world effects of indemnification, the Court can begin to repair some of the substantial flaws in its qualified immunity jurisprudence. As it does, it will permit more constitutional tort suits to succeed, thereby fostering law enforcement accountability. Because criminal liability is nearly impossible as a practical matter, and because strategies like improving police training and recruiting tactics will likely take years to effectively implement, civil suits are the (relatively) fastest way to demonstrate to the country that our officers are our guardians and that they are accountable to us. It is thus the most immediate way to rebuild trust and begin healing the citizen-police relationship.
